

CHAPTER V

CONCLUSION AND SUGGESTIONS

This chapter presented the conclusion that obtained from the findings and the discussion chapter 4. Additionally, several suggestions were pointed out to give more information and as a recommendation as well as to guidance the upcoming research with the same topic.

A. Conclusion

Based on the findings and the result of the study, it can be concluded as follows:

1. Teachers used three strategies proposed by Vacca and Vacca (1999) in teaching reading comprehension of descriptive text, they were: (1) Scaffolding, (2) Think aloud, (3) Question and Answer Relationship. These strategies used by the teachers in teaching reading comprehension is to make student comprehend the text well and overcoming the difficulties of student in learning reading comprehension.
2. The reason why the strategies of teaching reading comprehension used by the teacher were presented as follows : (1) by using the strategies students have a guidance in learning English especially reading comprehension to comprehend the text, (2) The strategies ease the student to comprehend the text (3) teachers believed the strategies is the way to assess students' comprehension about text (4) teachers believed the strategies is helping students difficulties in learning reading comprehension.

B. Suggestions

From the research result that have been concluded by the researcher, the writer would like to suggest some points to English Teachers, institution and the other researchers. And they are:

1. English Teachers

To improve students' ability in reading, especially in reading descriptive text. Teachers must prepare more than one strategy in teaching because the same strategy in lengthy period will decrease teachers' creativity in teaching, and it will cause students to feel bored. English teachers in this school also need to innovate their own strategies to be able in controlling and managing the class better than before.

2. Institution

The institution should supervise the teachers and make sure that teachers use creative and innovative strategies in the class especially in teaching reading comprehension. And the institution also must supply teachers with program that able to increase their teaching skills and improve their teaching strategies.

3. Other Researchers

If other researchers want to conduct same study, they must have considered the institution's capacity to accommodate researchers conducting research there. Additionally, they must ensure that the research subjects' consent to assistance. Also, they need to think about the best time to gather the data.
