

## ABSTRAK

**Misva Meltri Purba, NIM 4183121050, Pengaruh Model Pembelajaran Inkuiiri Terbimbing Terhadap Hasil Belajar Siswa Pada Materi Elastisitas Dan Hukum Hooke Di Kelas XI SMA Negeri 2 Percut Sei Tuan T.P 2023/2024.**

Penelitian ini bertujuan untuk meningkatkan hasil belajar siswa menggunakan model pembelajaran inkuiiri terbimbing pada materi elastisitas dan hukum hooke di kelas XI SMA Negeri 2 Percut Sei Tuan. Jenis penelitian ini adalah quasi experiment. Populasi dalam penelitian ini adalah seluruh siswa kelas XI SMA Negeri 2 Percut Sei Tuan. Sampel penelitian dilakukan dengan teknik cluster random sampling, kelas XI MIA-4 sebagai kelas eksperimen diberikan model pembelajaran inkuiiri terbimbing dan XI MIA-5 sebagai kelas kontrol diberikan model pembelajaran konvensional. Instrumen yang digunakan pada penelitian adalah tes pilihan ganda dengan jumlah 20 soal. Nilai rata-rata postest kelas eksperimen dan kelas kontrol masing-masing 76,03 dan 67,06. Berdasarkan hasil analisis uji t satu pihak didapat nilai  $t_{hitung} = 3,75$  dan  $t_{tabel} = 1,669$ , pada taraf signifikan 0,05 ( $t_h > t_t$ ). Hal ini menyatakan ada pengaruh signifikan model pembelajaran inkuiiri terbimbing terhadap hasil belajar siswa pada materi elastisitas dan hukum hooke di kelas XI SMA Negeri 2 Percut Sei Tuan.

**Kata Kunci:** Inkuiiri terbimbing, hasil belajar, elastisitas dan hukum Hooke

## ***ABSTRACT***

**Misva Meltri Purba, NIM 4183121050, *The Influence of the Guided Inquiry Learning Model on Student Learning Outcomes in the Material of Elasticity and Hooke's Law in XI Grade of Senior High School 2 Percut Sei Tuan T.P 2023/2024.***

*This study aims to investigate the enhancement of guided inquiry learning on elasticity and Hooke's law in XI grade of senior high school 2 Percut, Sei. Tuan. The methodology which used in this study is Quasi-experimental which involve all of the students in XI grade of Senior High School 2 Percut, Sei. Tuan. The samples are taken by using cluster random sampling technique, XI MIA-4 as experimental class which given guided inquiry learning model and XI MIA-5 as control class with conventional learning model. The instrument of this study is 20 multiple choice questions. The average post-test score for the control and experimental class are 76.03 and 67.06. Based on the t test analysis result, one party gained value of  $t_{count} = 3.75$  and  $t_{table} = 1.669$ , at significant level 0.05 ( $t_c > t_t$ ). It can be stated there is a significant increase in guided inquiry learning model on students learning outcomes on elasticity and Hooke's law of XI grade of Senior High School 2 Percut, Sei. Tuan.*

**Keywords:** *Guided inquiry, learning outcomes, elasticity and Hooke's law*
