

ABSTRAK

Duwi Pransiska Angriani, NIM: 5183342004. “Hubungan Sikap Belajar dengan Hasil Praktek Pembuatan Cokelat Praline di SMK Pariwisata Imelda”. Skripsi. Jurusan Pendidikan Kesejahteraan Keluarga. Program Studi Pendidikan Tata Boga. Fakultas Teknik. Universitas Negeri Medan 2024

Penelitian ini bertujuan untuk mengetahui: (1) sikap belajar siswa; (2) hasil praktek siswa pada pembuatan cokelat praline; (3) hubungan sikap belajar dengan hasil praktek siswa pada pembuatan cokelat praline. Lokasi penelitian dilaksanakan di SMK Pariwisata Imelda. Waktu penelitian Januari- Maret 2023. Populasi dalam penelitian ini adalah siswa kelas XII SMK Pariwisata Imelda Medan dengan jumlah 60 orang siswa. Pengambilan sampel menggunakan teknik *random class sampling*, sehingga yang menjadi sampel penelitian ini adalah siswa kelas Boga 2 dengan jumlah 30 siswa. Data sikap belajar dikumpulkan dengan menggunakan lembar pengamatan sikap belajar dan lembar penilaian hasil praktek. Analisis data penelitian ini terdiri dari analisis deskriptif, uji prasyarat analisis dan uji hipotesis dengan menggunakan rumus *Pearson Correlation*.

Sikap belajar siswa termasuk kategori cenderung Cukup, dibuktikan dengan tingkat kecenderungannilai antara >50-75 sebesar persen. Hasil praktek pembuatan cokelat praline termasuk kategori cenderung tinggi sebesar 50 persen. Terdapat hubungan yang positif dan signifikan antara sikap belajar siswa dan hasil praktek pembuatan cokelat praline dengan nilai r hitung 0,531 lebih besar dari nilai r tabel 0,334. Artinya semakin baik sikap belajar siswa maka semakin baik hasil praktik pembuatan cokelat praline.

ABSTRACT

Duwi Pransiska Angriani, NIM: 5183342004. "The Relationship between Learning Attitudes and the Results of Praline Chocolate Making Practices at Imelda Tourism Vocational School". Thesis. Family Welfare Education. Culinary Educations Study Program. Faculty of Engineering. Medan State University, 2024

This research aims to determine: (1) students' learning attitudes; (2) the results of students' practice in making praline chocolate; (3) the relationship between learning attitudes and the results of students' practice in making praline chocolate. The research location was carried out at Imelda Tourism Vocational School. The research time is January-March 2023. The population in this research is class XII students at Imelda Tourism Vocational School, Medan, with a total of 60 students. Sampling used a random class sampling technique, so that the samples for this research were 30 students in the Boga 2 class. Learning attitude data was collected using learning attitude observation sheets and practice results assessment sheets. Analysis of this research data consists of descriptive analysis, analysis prerequisite tests and hypothesis testing using the Pearson Correlation formula.

Students' learning attitudes fall into the category of tending to be Fair, as evidenced by the level of tendency for scores between >50-75 by percent. The results of the practice of making praline chocolate are in the category tending to be high at 50 percent. There is a positive and significant relationship between students' learning attitudes and the results of praline chocolate making practice with a calculated r value of 0.531 which is greater than the r table value of 0.334. This means that the better the student's learning attitude, the better the results of the praline chocolate making practice.
