

ABSTRAK

Padilahani, NIM 5193344012. Analisis Praktek Pemangkasan Rambut Diagonal Kebelakang Pada Siswa SMK Swasta Pariwisata Imelda. Jurusan Pendidikan Kesejahteraan Keluarga. Prodi: Pendidikan Tata Rias 2019. Fakultas: Teknik. Universitas Negeri Medan.

Pemangkasan diagonal kebelakang merupakan pemangkasan yang memanjang dari belakang dan terus memendek ke depan. Penelitian ini bertujuan untuk mengetahui praktek siswa dalam melakukan pemangkasan rambut diagonal kebelakang pada siswa kelas XI tata kecantikan SMK Swasta Pariwisata Imelda.

Penelitian ini merupakan penelitian deskriptif. Subjek penelitian ini terdiri dari siswa kelas XI di SMK Swasta Pariwisata Imelda yang sedang mengambil mata pelajaran pemangkasan rambut. Jumlah populasi 25 orang, sampel diambil dengan teknik total sampling sehingga jumlah sampel diambil dari seluruh populasi sebanyak 25 orang. Metode pengumpulan data dilakukan dengan menggunakan lembar pengamatan dengan kisi-kisi sebanyak 8 indikator dengan skor pada rentang 4-1 yang dinilai oleh 3 orang pengamat.

Hasil praktek pemangkasan rambut diagonal kebelakang diperoleh hasil dari setiap indikator analisis praktek pemangkasan rambut diagonal kebelakang dikategori cukup yaitu sebanyak 12 siswa dengan presentase 48% dengan rentang nilai interval 69 s/d 76. Berdasarkan pengolahan data pada lembar pengamatan dari 8 indikator diperoleh rata-rata nilai tertinggi terdapat pada indikator 3 dengan nilai rata-rata tertinggi yaitu 3,1 yaitu terdapat pada indikator ketepatan memparting rambut dan rata-rata skor terendah siswa dengan nilai rata-rata terendah yaitu 2,4 terdapat pada indikator 1 yaitu kelengkapan alat, bahan, lenan dan kosmetik. Secara keseluruhan hasil praktek pemangkasan rambut yang diperoleh siswa seluruhnya baik dengan rata-rata penilaian mendapat skor 3.

Kata Kunci : Hasil Praktek, Pemangkasan Rambut Diagonal Kebelakang

ABSTRACT

Padilahani, NIM 5193344012. Analysis of the Practice of Cutting Diagonal Hair Backwards Among Students At The Imelda Tourism Private Vocational School. Department of Family Welfare Education. Study Program: Cosmetology Education 2019. Faculty: Engineering. Medan State University.

Backward diagonal pruning is pruning that lengthens from the back and continues to shorten to the front. This research aims to determine students' practices in trimming hair diagonally backwards in class

This research is a descriptive research. The subjects of this research consisted of class XI students at the Imelda Tourism Private Vocational School who were taking hair cutting subjects. The total population is 25 people, samples were taken using a total sampling technique so that the number of samples taken from the entire population was 25 people. The data collection method was carried out using an observation sheet with a grid of 8 indicators with scores in the range 4-1 which were assessed by 3 observers.

The results of the practice of cutting diagonal hair backwards were obtained from each indicator of the practice of cutting diagonal hair backwards in the sufficient category, namely 12 students with a percentage of 48% with an interval value range of 69 to 76. Based on data processing on the observation sheet for 8 indicators, the average was obtained. The highest score is in indicator 3 with the highest average score of 3.1, namely in the indicator of hair parting accuracy and the lowest average score for students with the lowest average score of 2.4 is in indicator 1, namely completeness of tools, materials, linens and cosmetics. Overall, the results of the hair cutting practice obtained by the students were all good with an average score of 3.

Keywords: Practice Results, Diagonal Back Hair Trimming
