

ABSTRAK

Handayani Saragi, NIM 5203144018. Analisis Hasil Praktek Pemangkas Rambut Diagonal Kebelakang (Oval) Pada Siswa Kelas XI SMK Swasta PAB 12 Saentis. Jurusan Pendidikan Kesejahteraan Keluarga. Prodi Tata Rias 2020. Fakultas Teknik. Universitas Negeri Medan.

Masih terdapat siswa yang kesulitan dalam melakukan pemangkasan diagonal kebelakang (oval). Adapun masalah yang dihadapi siswa yaitu, hasil pangkasan rambut masih tidak seimbang antara kiri dan kanan, hasil pemangkasan diagonal kebelakang tidak berbentuk melengkung kebawah, siswa masih kesulitan mendapatkan hasil pangkasan sesuai garis pola pemangkasan, hasil pemangkasan rambut diagonal kebelakang terlihat panjang pendek dan kurang rapi. Penelitian ini bertujuan untuk mengetahui hasil praktek pemangkasan diagonal kebelakang (oval) pada siswa kelas XI program keahlian tata kecantikan kulit dan rambut di SMK Swasta PAB 12 Saentis.

Penelitian ini merupakan deskriptif kuantitatif. Subjek penelitian ini terdiri dari siswa Kelas XI Tata Kecantikan Kulit dan Rambut di SMK Swasta PAB 12 Saentis. Jumlah populasi 45 orang, sampel diambil dengan teknik simple random sampling dengan jumlah sampel sebanyak 30 orang. Metode pengumpulan data dilakukan dengan menggunakan lembar pengamatan dengan kisi kisi sebanyak 5 indikator penilaian dengan skor rentang 4-1 yang dinilai oleh 3 orang pengamat.

Hasil praktek pemangkasan rambut diagonal kebelakang (oval) diperoleh nilai rata-rata siswa sebesar 53,9 dengan nilai tertinggi 100 dan nilai terendah 73. berdasarkan tingkat kecendrungan hasil praktek pemangkasan rambut diagonal kebelakang (oval) dari 30 orang sampel penelitian terdapat 13 siswa (43%) memiliki hasil praktek pemangkasan rambut diagonal kebelakang (oval) yang tinggi, sebanyak 8 orang (27%) memiliki hasil praktek pemangkasan rambut diagonal kebelakang (oval) yang cukup, sebanyak 5 orang (17%) memiliki hasil praktek pemangkasan rambut diagonal kebelakang (oval) yang kurang, sebanyak 4 orang (13%) memiliki hasil praktek pemangkasan rambut diagonal kebelakang (oval) yang rendah.

Kata Kunci : Hasil Praktek, Pemangkas, Pemangkas.

ABSTRACT

Handayani Saragi, NIM 5203144018. Analysis of the Results of the Practice of Cutting Back Diagonal (Oval) Hair in Class XI Students of the Private Vocational School PAB 12 Saentis. Department of Family Welfare Education. Cosmetology Study Program 2020. Faculty of Engineering. Medan State University.

There are still students who have difficulty doing diagonally backward (oval) trimming. The problems faced by students are, the results of hair cutting are still not balanced between left and right, the results of cutting diagonally backward do not curve downwards, students still have difficulty getting the results according to the lines of the trimming pattern, the results of cutting diagonally hair backwards look short and not neat. This study aims to determine the results of the practice of cutting diagonally backward (oval) in class XI students of the skin and hair beauty skills program at PAB 12 Saentis Private Vocational School.

This research is quantitative descriptive. The subjects of this research consisted of students from Class XI Skin and Hair Beauty at the PAB 12 Saentis Private Vocational School. The total population is 45 people, the sample was taken using a simple random sampling technique with a sample size of 30 people. The data collection method was carried out using an observation sheet with a grid of 5 assessment indicators with a score range of 4-1 which was assessed by 3 observers.

The results of the practice of cutting hair diagonally backwards (oval) obtained an average student score of 53.9 with the highest score being 100 and the lowest score being 73. Based on the level of tendency of the results of the practice of cutting hair diagonally backwards (oval) of the 30 research samples there were 13 students (43 %) had high results from the practice of cutting diagonally backwards (oval) hair, as many as 8 people (27%) had sufficient results from the practice of cutting diagonally backwards (oval) hair, as many as 5 people (17%) had results from the practice of cutting diagonally backwards hair (oval) is lacking, as many as 4 people (13%) have low results from the practice of cutting diagonal hair backwards (oval).
