

ABSTRAK

Bella Susanto. 5201142001. "Hubungan Minat Belajar Dengan Hasil Praktik Dekorasi Kue Di SMK Negeri 10 Medan". Program Studi Pendidikan Tata Boga. Jurusan Pendidikan Kesejahteraan Keluarga. Fakultas Teknik. Universitas Negeri Medan. 2025.

Penelitian ini bertujuan untuk mengetahui : (1) Minat belajar siswa; (2) Hasil Praktik Dekorasi Kue; (3) Hubungan Minat Belajar Dengan Hasil Praktik Dekorasi Kue. Tempat penelitian dilaksanakan di SMK Negeri 10 Medan, waktu penelitian November 2024 – Januari 2025. Populasi dalam penelitian ini seluruh siswa kelas XI Kuliner. Teknik penentuan sampel secara Random Sampling Kelas dan jumlah sampel 31 siswa. Teknik pengumpulan data dengan angket untuk Minat Belajar, untuk Hasil Praktik Dekorasi Kue menggunakan lembar penilaian hasil praktik. Teknik analisis data menggunakan deskripsi data, uji kecenderungan dan uji persyaratan analisis, yaitu : uji normalitas dan uji linieritas. Uji hipotesis dengan uji korelasi product moment.

Hasil penelitian menunjukkan bahwa tingkat kecenderungan minat belajar termasuk kategori cenderung cukup sebesar 54,84 persen dan Tingkat kecenderungan hasil praktik dekorasi kue termasuk kategori cenderung baik sebesar 74,19 persen. Hasil analisis korelasi product moment terdapat hubungan yang positif dan signifikan antara minat belajar dengan hasil praktik dekorasi kue dengan nilai $r_{hitung} > r_{tabel}$ ($0,45 > 0,355$) pada taraf signifikansi 5 persen. Artinya semakin tinggi minat belajar siswa maka semakin tinggi hasil praktik dekorasi kue. Hasil koefisien determinasi (r^2) = 0,20 atau 20 persen artinya minat belajar memberikan kontribusi 20 persen terhadap variabel hasil praktik dekorasi kue, sedangkan 80 persen dijelaskan oleh faktor lain diluar penelitian ini.

ABSTRACT

Bella Susanto 5201142001. "The Relationship Between Learning Interest And The Results Of Cake Decoration Practice At SMK Negeri 10 Medan". Culinary art Education Study Program. Family Welfare Education Major. Faculty of Engineering. Medan State University. 2025.

This research aims to find out: (1) Students' learning interest; (2) Results of Cake Decorating Practice; (3) Relationship of Learning Interest with Cake Decorating Practice Results. The research site was held at SMK Negeri 10 Medan, the research period was November 2024 - January 2025. The population in this study is all students of class XI Culinary. Sample determination technique by Random Sampling Class and the number of samples of 31 students. Data collection techniques with questionnaires for Learning Interest, for Cake Decoration Practice Results using practice results assessment sheets. Data analysis techniques use data sdescription, tendency test and analysis requirement test, namely: normality test and linearity test. Hypothesis test with product moment correlation test.

The results of the study showed that the level of tendency of interest in learning in the category tends to be sufficient by 54,84 percent and the level of tendency of the results of cake decoration practice in the category tends to be good by 74,19 percent. The results of the product moment correlation analysis there is a positive and significant relationship between learning interest and the results of cake decoration practice with $t_{count} > t_{table}$ ($0,45 > 0,355$) at a significance level of 5 percent. It means that the higher the student's interest in learning, the higher the result of cake decoration practice. The result of the coefficient of determination (r^2) = 0.20 or 20 percent means that the interest in learning contributes 20 percent to the variable of the cake decoration practice, while 80 percent is explained by other factors outside of this study.
