ABSTRACT

Nadhira Zahra Siregar. 7203210018. The Influence of Locus of Control, Competence, and Communication on Employee Performance at Haji Medan General Hospital. Management Department, Management Study Program. Faculty of Economics, Medan State University

This research aims to: (1) determine the effect of locus of control on employee performance at the Haji Medan general hospital; (2) determine the effect of competency on employee performance at the Haji Medan general hospital; (3) determine the effect of communication on employee performance at the Haji Medan general hospital; (4) determine the effect of locus of control on employee competence at the Haji Medan general hospital; (5) determine the effect of locus of control on employee performance through competency at the Haji Medan general hospital. This research is a quantitative research and was conducted at the Haji Medan general hospital with the sample used in this research totaling 100 people using a sampling technique using the simple random sampling method. The data in this study was taken by taking data from the Medan Haji Hospital and distributing questionnaires to nurses. The analysis technique used in testing the hypothesis is the path analysis technique. The research results show that: (1) locus of control partially has a positive and significant effect on the performance of employees at the Haji Medan General Hospital. (2) competency partially has a positive and significant effect on the performance of employees at the Haji Medan General Hospital. (3) communication partially has a positive and significant effect on the performance of employees at the Haji Medan General Hospital. (4) locus of control partially has a positive and significant effect on the competency of Haji Medan general hospital employees. (5) locus of control partially has a positive and significant effect on performance through the competency of Haji Medan general hospital employees.

Keywords: Locus of Control, Competence, Communication, Employee Performance.
