

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

Based on the results of the research and discussion, it can be concluded that:

1. The results of the assessment of the material expert team on the feasibility of aspects of content feasibility, depth of material, language feasibility, and presentation of the Vertebrate Diversity Booklet at Siantar Zoo developed are included in the "very feasible" criteria in terms of material presentation.
2. The results of the assessment of the media expert team on the feasibility of aspects of booklet feasibility, cover design, and content design of the Vertebrate Diversity Booklet at Siantar Zoo developed are included in the "very feasible" criteria in terms of media presentation.
3. According to the response of the teacher in the field of Biology at SMA N 1 Pematangsiantar, the Vertebrate Diversity Booklet at Siantar Zoo is included in the "very feasible" criteria to be used in the learning process as a learning resource for students.
4. According to the students' response to the limited field trial, it was stated that the Vertebrate Diversity Booklet at Siantar Zoo was included in the "very feasible" criteria to be used as a student learning resource.
5. The results of the study show that the product developed in the form of a Vertebrate Diversity Booklet at Siantar Zoo is quite effective in improving student learning outcomes.

5.2. Suggestion

Based on the above conclusion, the author puts forward several suggestions:

1. It is recommended that the assessment by the expert team be carried out by at least two expert teams, as a comparative material in assessing the product.
2. To get maximum results, it is necessary to conduct further research on a larger and wider sample.
3. To see the effectiveness of the product, it should be done with more complete and complex stages, especially at the product trial stage.
