

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

After collected data and analysed it, the conclusion were drawn as following: Based on observations with students of SMPN 7 Medan, it was found that students needed an analysis of necessities, wants and lacks. Whereas for the target needs necessities, students need digital media for learning students' reading comprehension, next for the target needs wants, students want material that can increase their knowledge about vocabulary. However, when understanding the contents of the text students have difficulty understanding the contents of the text because of their lack of knowledge about vocabulary. Therefore the author provides vocabulary for each text in the material in the Kahoot. And based on validation from two experts, the average score given by experts was 4.5 and 4.9 or 94.5%. The score showed that the worksheet was valid and appropriate to be used as students' worksheet in teaching reading comprehension of descriptive text for grade eight at SMPN 7 Medan.

B. Suggestions

After developing students' worksheet for grade eight, some suggestions were recommended for students, teacher, and other researcher.

For the students, it is recommended to be used because the media used is attractive and easily understood by students

For the teacher, it is suggested that during the teaching and learning process, the teacher should be more sensitive to the needs of the students, such as when selecting learning material and using media teachers could utilize a variety of resources to create engaging and inventive worksheet. In this study, a worksheet created with Kahoot! . However, teachers could combine it with other tactics or strategies to assist students in achieving their English proficiency goals, particularly in the reading skill.

For other researcher, it is suggested that they could developed another worksheet for junior high school students by using other digital media such as live worksheets, Canva, powtoon. Researchers are expected to be able to create more interesting worksheet media which will make students learn in a fun way.
