

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the results of digital worksheet QuizWhizzer development research in teaching writing procedure text for seventh-grade at SMP Negeri 3 Percut Sei Tuan, it can be concluded that:

1. The existing worksheet used for teaching procedure text in class VII-2 at SMP Negeri 3 Percut Sei Tuan only used the government textbook as media and worksheet. Teachers rarely used other tools in teaching procedure text, Teacher only utilized the textbook for all the materials in the teaching and learning process. The students also struggle in writing procedure text because lack of vocabulary and grammar. Thus, the reason of they are passive in learning process, they feel less motivated and engaged to the subject. In addition, writing is assumed to be a complex activity, they feel difficulties to follow the learning process, as the tools in the learning process do not required them to be willing to learn. So, the researcher decides to develop a digital worksheet using QuizWhizzer in teaching writing procedure text to provide appropriate writing tasks for the students, and students can understand and improve their writing ability and participate actively in the classroom, also they feel enjoy and relax while doing a complex process of writing.

2. In developing a product, the researcher refers to students' need analysis and learning objectives according to the Merdeka Curriculum. The tasks designed by the researcher also refers the Web-application QuizWhizzer.
3. The developing student worksheet is categorized as "very good" and can be used in teaching and learning process. The average score from the first expert is 90% and the second expert is 97%. So that, the average score from both expert is 93,5%.

### **B. Suggestion**

The following suggestions must be focused on conducting related research. Teachers must be conscious of their student's need to master writing abilities. The teacher should provide students with various media or tools in the teaching-learning process, especially in exercising their writing abilities. The teacher should present worksheets that are appropriate for the student's needs.

Students should also learn more about procedure text and practice writing skills both inside and outside of the classroom in order to improve their writing.

The students must be actively engaged in the teaching and learning process.

For other researchers, it is suggested that they could developed another digital worksheet for junior highschool students, by using other digital media such as quizziz, liveworksheets, wordwall, and so on. Researchers are expected to be able to create more engaging worksheet media which will make students enjoy and easier to understand.
