CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consist of two parts which are conclusion and suggestion. First, the conclusion presents a summary of the study. Second, the suggestion is presented for the readers, English language learners, and future researchers.

5.1 Conclusion

After analyzing the hate speech comments on Joe Biden's Instagram posts, the researcher concluded, that the researcher found 8 types out of 10 types of hate speech according to Mondal (2018), they are race, behavior, physical, class, ethnicity, disability, sexual orientation, and other.

Behavior as the most used/realized hate speech on Joe Biden's Instagram posts. The netizens used Behavior type of hate speech because they wanted to criticized the action that Joe Biden took for support Israel.

The researcher found out the most reason or the most intention of the netizens for using hate speech is Insulting, which is they want to insult or demean Joe Biden for his behavior or action on this problem.

5.2 Suggestion

The researcher acknowledged that this study still possesses weaknesses as a result of its constraints. Therefore, the researcher proposed the following advice to the readers in order to adopt a pragmatic attitude towards hate speech:

1) The researcher aims to offer readers multiple perspectives on pragmatic studies, particularly as it pertains to hate speech.

2) Linguistics and literature students are required to utilize this research as a point of reference for undertaking further research on hate speech, employing a pragmatic approach or other linguistic approaches, such as semantic or sociolinguistic, etc.
