CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter deals with summerizes of the research findings covered in the preceding chapter and offers some suggestions for teacher, students, and further researcher.

A. Conclusions

The objectives of this research is to discover the benefits of using the wordwall website and the procedures of wordwall website used by the teacher as a students' worksheet in reading recount text at 8th grade of SMP N 3 Sitiotio. Based on the findings of the research that had been done, the goals are discovered. As a result, it may concluded that:

1. There were seven benefits of using wordwall website as a students' worksheet: (1) easy access, (2) flexible sharing, (3) user-friendly, (4) able offline access, (5) enhanced learning, (6) saving time for teacher, (7) can be shared with the Wordwall community. However, there are also some limitations of the platform, particularly in the free version. Only 18 from 33 free templates were available, and the activities accessible in the free version was limited to four. The teacher emphasized that not all free templates were suitable for use as a students' worksheet for reading skills, so choosing the right template was essential to ensure learning activities remain relevant and effective.

2. There were eight procedures to create a students'worksheet using the wordwall website in reading recount text began with (1) open the Wordwall website (https://wordwall.net), (2) log in, (3) select "create activity", (4) input questions and key answers, (5) click "done" button, (6) adjust "options", (7) click "apply to this activity" button, then (8) share the activity to the students.

B. Suggestions

Based on the conclusion above, the researcher would like to provide the following suggestions which are expected to be implemented as well as serve as input for the relevant involved in the learning process at school. These suggestions are proposed as a follow-up to this study:

1. Teacher

The researcher recommends for the teacher to consider using the premium version of the Wordwall website. By accessing the premium version, teachers can utilize all available templates up to 33 templates designed to significantly enhance the learning experience for students. Additional features such as timers, end-of-game options, and marking allow for increased interactivity and enable the teacher to track students progress more effectively. Furthermore, using the premium version eliminates the limits of activities that can be created, ensuring the sustainability of Wordwall usage in the long term.

2. Students

Students should actively participate in the interactive activities provided on Wordwall website, such as quizzes and matching activity as a students'

worksheet. So, the teacher can refine their use of Wordwall and better cater to students' needs.

3. Further Researcher

    Future researchers who will conduct similar research, this study is expected to help and to give more information about the use of wordwall website as a students' worksheet in reading activity. The researcher also recommend future researcher to explore in greater depth the use of Wordwall's premium features and how these features can enhance students' learning experiences.
