

## PREFACE

All praise and gratitude the author sends to the presence of Allah Subhanahu Wa Ta'ala, for all His grace and mercy that provide health and wisdom as well as opportunities to the author so that the thesis entitled "The Influence of Problem Based Learning Models Assisted with Interactive Flipbook on Students' Physics Learning Outcomes in Optical Geometry Material Class XI MAS Plus AI- Ulum Medan" can be completed properly. With humility the author expresses his gratitude to the Rector of Medan State University, Mr. Prof. Dr. Baharuddin, S.T., M.Pd. Dean of the Faculty of Mathematics and Natural Sciences UNIMED, Mrs. Dr. Ani Sutiani, M.Si., for the opportunity given to the author to follow and complete her education in obtaining a bachelor's degree in education at Medan State University. Head of Physics Department, mam Dr. Yuni Warty, S.Pd., M.Si., Secretary of Department Sir Budiman Nasution, S.Pd., M.Si., Head of Physics Education Study Program, Sir Sabani, S.Pd., M.Si., along with all educational and administrative staff in Physics Education Study Program, State University of Medan. On this occasion, the author would also like to thank Prof. Motlan, M.Sc., Ph.D as the thesis supervisor who has provided suggestions, guidance and scientific advice during the research and writing of the thesis. I would also like to thank Prof. Drs. Togi Tampubolon, M.Si., Ph.D, Mam Dr.Eng. Jubaidah, M.Si., and Sir Dr. Juniastel Rajagukguk, M.Si. as the Examiner who has provided input and advice starting from research planning and completing the preparation of this thesis. The author would like to thank Dr. Dewi Wulandari, M.Si as the academic supervisor who guided the author during his studies at the State University of Medan. Thanks to the head of the laboratory Muhammad Kadri, S.Si., M.Sc., Ph.D. who has provided experience and permission to use the laboratory facilities. Thanks to Sir Dr. Rahmatsyah, M.Si and Mam Dr. Rita Juliani, M.Si. who have provided the opportunity to study in the Electrical laboratory.

The author would like to express her special gratitude to his beloved father Sahrul Hadi, ST and mother Laila Fatma, to his two older brothers Syahputra Hadi Kesuma, A.md and Ahmad Surya, to his younger brother Muhammad Reza Fadilla, to his two sisters in law Fitri Mandarwati and Mutia Fahira, and all family members

who cannot be mentioned all for their prayers, encouragement, support and love for the author so that this thesis can be completed well.

Thank you also to the members of the apaa kekk group and all the electrical laboratory assistants who have filled my daily lives, carved laughter, and helped during lectures and in completing the thesis. Thank you to Kk Indai, who always helped and shared many things. Thank you to my fellow PESP 20 friends for the experience and cooperation during lectures. Lastly, don't forget to thank myself, the main character in compiling this thesis. See, you did it! Thank you for your hard work and courage to face and overcome all obstacles. Thank you for being patient through each stage. Let's get through the next stage better.

The author realizes that this paper is far from perfect. Therefore, with all sincerity and humility, constructive criticism and suggestions are highly expected for improvement and refinement in the future. Hopefully, this paper can be useful for the development of science.
