

## ABSTRAK

**Putri Angelica Silitonga. 5213342022. “Hubungan Intensitas Penggunaan *Google* Dengan Hasil Praktik Puding Lapis Di SMK Swasta Arina Sidikalang”. Pendidikan Kesejahteraan Keluarga. Pendidikan Tata Boga. Fakultas Teknik. Universitas Negeri Medan. 2025.**

Penelitian ini bertujuan untuk mengetahui: (1) Intensitas Penggunaan *Google* Siswa, (2) Hasil Praktik Siswa dalam Mengolah Puding Lapis, (3) Hubungan Intensitas Penggunaan *Google* dengan Hasil Praktik Puding Lapis. Tempat penelitian di SMK Swasta Arina Sidikalang. Alamat Jl. Empat Lima No.141, Batang Beruh, Kec Sidikalang, Kab Dairi, Sumatera Utara. Waktu penelitian dilaksanakan mulai semester ganjil (T.A 2025/2026) bulan Agustus 2025. Populasi dalam penelitian ini siswa kelas XI Tata Boga dengan Jumlah sampel 30 siswa. Teknik pengambilan sampel secara total sampling dengan jumlah sampel 30 siswa. Desain penelitian yang digunakan dalam penelitian ini adalah deskriptif korelasional. Teknik pengumpulan data menggunakan angket dan penilaian hasil praktik puding lapis. Teknik analisis data secara deskriptif, tingkat kecenderungan data, dan uji persyaratan analisis dengan uji linier dan uji normalitas. Uji hipotesis dengan uji korelasi product moment.

Berdasarkan hasil penelitian ini menunjukkan bahwa (1) tingkat kecenderungan Variabel Intensitas Penggunaan *Google* termasuk kategori cenderung tinggi sebesar 70 persen. (2) Tingkat kecenderungan Hasil Praktik Puding Lapis termasuk kategori cenderung baik sebesar 70 persen. (3) Hasil analisis korelasi Product Moment terdapat hubungan yang positif dan signifikan antara Intensitas Penggunaan *Google* dengan Hasil Praktik Puding Lapis dengan koefisien korelasi Product Moment  $r_{hitung} > r_{tabel}$  yaitu  $(0.49 > 0.361)$  pada taraf signifikan 5 persen. Artinya semakin tinggi Intensitas Penggunaan *Google* maka semakin tinggi Hasil Praktik Puding Lapis.

**Kata Kunci:** Intensitas penggunaan *google*, praktik puding lapis

## ABSTRACT

*Putri Angelica Silitonga. 5213342022. "The Relationship Between Google Usage Intensity and the Results of Layered Pudding Experiments at Arina Sidikalang Private Vocational School." Family Welfare Education. Culinary Arts Education. Faculty of Engineering. State University of Medan. 2025.*

*This study aims to determine: (1) the intensity of students' Google use, (2) the results of students' layered pudding experiments, and (3) the relationship between Google usage intensity and the results of layered pudding experiments. The research location is Arina Sidikalang Private Vocational School, Jl. Empat Lima No. 141, Batang Beruh, Sidikalang District, Dairi Regency, North Sumatra. The research was conducted starting in the odd semester (2025/2026 academic year) in August 2025. The population in this study was 11th-grade Culinary Arts students with a sample size of 30 students. The sampling technique used total sampling with a sample size of 30 students. The research design used in this study was descriptive correlational. Data collection techniques used questionnaires and assessments of the results of the layered pudding practice. Data analysis techniques were descriptive, with data trend levels and analysis requirements tested using linearity and normality tests. Hypotheses were tested using the product-moment correlation test.*

*The results of this study indicate that (1) the trend level for the variable Google Usage Intensity is categorized as high at 70 percent. (2) The trend level for the Layered Pudding Practice Results is categorized as good at 70 percent. (3) The results of the Product Moment correlation analysis showed a positive and significant relationship between Google Usage Intensity and the Results of the Layered Pudding Practice, with a Product Moment correlation coefficient of  $r_{hitung} > r_{tabel}$  ( $0.49 > 0.361$ ) at a significance level of 5 percent. This means that the higher the Google Usage Intensity, the higher the Results of the Layered Pudding Practice.*

**Keywords:** *Google Usage Intensity, Layered Pudding Practice*
