

ABSTRAK

EIRAEN JANE GULTOM. Pengaruh Program Rumah Pintar Ompu Anggiat Yayasan Mual Hapistaran (RUMPIN) Terhadap Minat Baca Anak-anak di Desa Rahutbosi Kecamatan Pangaribuan. Skripsi. Medan : Fakultas Ilmu Pendidikan. Universitas Negeri Medan. 2026.

Penelitian ini bertujuan untuk mengetahui pengaruh Program Rumah Pintar Ompu Anggiat Yayasan Mual Hapistaran (RUMPIN) terhadap minat baca anak-anak di Desa Rahutbosi Kecamatan Pangaribuan. Penelitian ini menggunakan pendekatan kuantitatif dengan metode deskriptif. Populasi sekaligus sampel dalam penelitian ini berjumlah 30 anak yang mengikuti kegiatan di Rumah Pintar Ompu Anggiat Yayasan Mual Hapistaran, dengan teknik total sampling. Teknik pengumpulan data menggunakan angket. Instrumen yang digunakan berupa kusioner dengan 20 pertanyaan yang telah di uji validitas dan reabilitasnnya. Analisis data dilakukan dengan uji validitas, uji reliabilitas, uji normalitas Kolmogorov–Smirnov, analisis regresi linear sederhana, uji hipotesis (uji t), dan uji determinasi menggunakan program SPSS. Hasil uji normalitas menunjukkan bahwa data penelitian berdistribusi normal dengan nilai $> 0,05$. Hasil analisis regresi linear sederhana menunjukkan persamaan regresi $\hat{Y} = 6,754 + 0,899X$, yang berarti bahwa Rumah Pintar berpengaruh positif terhadap minat baca anak-anak. Berdasarkan hasil uji t diperoleh nilai t hitung sebesar 5,65, sedangkan t tabel sebesar 2,048. Karena t hitung $>$ t tabel ($5,65 > 2,048$) dan nilai signifikansi $0,000 < 0,05$, maka hipotesis alternatif diterima. Selanjutnya, hasil uji determinasi menunjukkan nilai R Square sebesar 0,531, yang berarti bahwa Rumah Pintar memberikan kontribusi sebesar 53,1% terhadap minat baca anak-anak, sedangkan 46,9% dipengaruhi oleh faktor lain yang tidak diteliti. Dengan demikian, dapat disimpulkan bahwa Rumah Pintar Ompu Anggiat Yayasan Mual Hapistaran berpengaruh terhadap minat baca anak-anak di Desa Rahutbosi Kecamatan Pangaribuan.

ABSTRACT

EIRAEN JANE GULTOM. The Influence of the Ompu Anggiat Smart House Program of the Mual Hapistaran Foundation (RUMPIN) on Children's Reading Interest in Rahutbosi Village, Pangaribuan District. Skripsi. Medan. Faculty of Education. State University of Medan. 2026.

This study aims to determine the effect of the Ompu Anggiat Smart House Program of Mual Hapistaran Foundation (RUMPIN) on children's reading interest in Rahutbosi Village, Pangaribuan District. This research employed a quantitative approach with a descriptive method. The population as well as the sample consisted of 30 children who participated in activities at the Ompu Anggiat Smart House, using a total sampling technique. Data were collected through a closed-ended questionnaire using a Likert scale. Data analysis was conducted using validity and reliability tests, the Kolmogorov–Smirnov normality test, simple linear regression analysis, hypothesis testing (t-test), and the coefficient of determination with the assistance of SPSS software. The results of the normality test indicated that the research data were normally distributed, with a significance value greater than 0.05. The results of simple linear regression analysis showed the regression equation $\hat{Y} = 6.754 + 0.899X$, indicating that the Smart House had a positive effect on children's reading interest. The hypothesis testing results showed a significance value of $0.000 < 0.05$; therefore, the alternative hypothesis was accepted. Furthermore, the coefficient of determination test showed an R Square value of 0.531, which means that the Smart House contributed 53.1% to children's reading interest, while the remaining 46.9% was influenced by other factors not examined in this study. Thus, it can be concluded that the Ompu Anggiat Smart House of Mual Hapistaran Foundation has a positive and significant effect on children's reading interest in Rahutbosi Village, Pangaribuan District.
