

## ABSTRAK

**Devita Salwa Enggriana. 5213142007. “Hubungan Komunikasi Interpersonal dengan Hasil Praktik American Service SMK Putra Anda Binjai”. Pendidikan Kesejahteraan Keluarga. Pendidikan Tata Boga. Fakultas Teknik. Universitas Negeri Medan. 2025.**

Penelitian ini bertujuan untuk mengetahui : (1) Tingkat Komunikasi Interpersonal Siswa; (2) hasil praktik *American Service*; (3) Hubungan Komunikasi Interpersonal Dengan Hasil Praktik *American Service*. Tempat penelitian ini dilaksanakan di SMK Putra Anda Binjai, waktu penelitian bulan Agustus – September 2025. Desain penelitian ini adalah deskriptif korelasional. Teknik pengumpulan data menggunakan angket dan penilaian hasil praktik *American Service*. Teknik analisa data secara deskriptif, tingkat kecenderungan data, dan uji persyaratan analisis dengan uji linear dan uji normalitas. Uji hipotesis dengan uji produk moment dan uji koefisien determinasi.

Berdasarkan hasil penelitian ini menunjukkan bahwa tingkat kecenderungan variabel komunikasi interpersonal termasuk dalam kategori cukup sebesar 83,3 persen. Tingkat kecenderungan hasil praktik *American Service* termasuk dalam kategori baik sebesar 70,00 persen. Hasil analisis korelasi *Product Moment* terdapat hubungan yang positif dan signifikan antara Komunikasi Interpersonal dengan Hasil Praktik *American Service* dengan nilai  $r_{hitung} > r_{tabel}$  ( $0,71 > 0,36$ ) pada taraf signifikan 5 persen. Artinya, semakin tinggi tingkat komunikasi interpersonal siswa maka semakin tinggi hasil praktik *American Service*. Hasil koefisien determinasi sebesar 50,41 persen. Artinya, komunikasi interpersonal memberikan kontribusi sebesar 50,41 persen terhadap hasil praktik *American Service*, sedangkan 49,59 persen dari faktor lain diluar penelitian ini.

## ABSTRACT

**Devita Salwa Enggriana. 5213142007. "The Relationship Between Interpersonal Communication and the American Service Practice Results of Students at SMK Putra Anda Binjai." Family Welfare Education, Culinary Education, Faculty of Engineering, State University of Medan, 2025.**

This study aims to determine: (1) the level of students' interpersonal communication; (2) the results of American Service practice; and (3) the relationship between interpersonal communication and the results of American Service practice. The research was conducted at SMK Putra Anda Binjai from August - September 2025. The research design used was descriptive correlational. Data collection techniques included questionnaires and performance assessments of American Service practice. Data analysis techniques consisted of descriptive analysis, trend level analysis, and prerequisite tests using linearity and normality tests. The hypothesis was tested using the Product Moment correlation test and the coefficient of determination test.

The results showed that the level of interpersonal communication fell into the "moderate" category at 83.3 percent, while the trend level of American Service practice results was in the "good" category at 70.00 percent. The Product Moment correlation analysis revealed a positive and significant relationship between interpersonal communication and American Service practice results, with  $r_{\text{count}} > r_{\text{table}}$  ( $0.71 > 0.36$ ) at a 5 percent significance level. This indicates that the higher the students' interpersonal communication skills, the better their American Service practice results. The coefficient of determination was 50,41 percent, meaning that interpersonal communication contributed 50,41 percent to the American Service practice results, while 49,59 percent was influenced by other factors outside this study.
