

ABSTRAK

Tiara Dwi Khairanti. 5213342012. “Hubungan Minat Wirausaha dan Dukungan Orang Tua dengan Hasil Praktik Adonan Beragi Di SMK Pariwisata Imelda Medan”. Pendidikan Tata Boga. Pendidikan Kesejahteraan Keluarga. Fakultas Teknik. Universitas Negeri Medan 2026.

Penelitian ini bertujuan untuk mengetahui: (1) Minat Wirausaha siswa; (2) Dukungan Orang Tua; (3) Hasil Praktik Adonan Beragi; (4) Hubungan minat wirausaha siswa dengan hasil praktik adonan beragi; (5) Hubungan dukungan orang tua dengan hasil praktik adonan beragi; (6) Hubungan minat wirausaha dan dukungan orang tua dengan hasil praktik adonan beragi. Lokasi penelitian dilakukan di SMK Pariwisata Imelda Medan. Waktu penelitian ini dilakukan pada November 2025. Populasi penelitian siswa kelas XI Tata Boga. Teknik penentuan sampel secara *random sampling* dan jumlah sample 40 siswa. Data dikumpulkan menggunakan angket (minat wirausaha dan dukungan orang tua) dan lembar penilaian hasil Praktik (hasil Praktik adonan beragi). Teknik analisis data secara deskripsi data, dan uji persyaratan analisis dengan uji normalitas dan uji linieritas serta uji hipotesis dengan uji korelasi *product moment*, uji parsial dan korelasi ganda.

Hasil penelitian menunjukkan bahwa tingkat kecenderungan minat wirausaha siswa termasuk dalam kategori cenderung cukup sebesar (50) persen, dukungan orang tua termasuk kategori cukup sebesar (77,50) persen, dan hasil praktik adonan beragi termasuk kategori baik sebesar (87,50) persen. Hasil analisis korelasi parsial, terdapat hubungan yang positif dan signifikan antara minat wirausaha dengan hasil praktik adonan beragi dengan nilai koefisien parsial ($r_{YX_1X_2} = 0,633$) dan nilai $t_{hitung} > t_{tabel}$ ($5,041 > 2,023$) pada taraf signifikan 5 persen. Terdapat hubungan yang positif dan signifikan antara dukungan orang tua dengan hasil praktik adonan beragi dengan nilai koefisien parsial ($r_{YX_2X_1} = 0,582$) dan nilai $t_{hitung} > t_{tabel}$ ($4,412 > 2,023$) pada taraf signifikan 5 persen. Hasil analisis korelasi ganda, terdapat hubungan yang positif dan signifikan antara minat wirausaha dan dukungan orang tua dengan hasil praktik adonan beragi dengan nilai koefisien ($R_{YX_1X_2} = 0,688$) dan nilai $F_{hitung} > F_{tabel}$ ($16,627 > 3,36$) pada taraf signifikan 5 persen.

Kata Kunci: Minat Wirausaha, Dukungan Orang Tua, Hasil Praktik Adonan Beragi

ABSTRACT

Tiara Dwi Khairanti. 5213342012. "The Relationship between Entrepreneurial Interest and Parental Support with the Results of Yeast Dough Practice at Imelda Tourism Vocational School, Medan". Culinary Arts Education. Family Welfare Education. Faculty of Engineering. State University of Medan 2026.

This study aims to determine: (1) Students' Entrepreneurial Interest; (2) Parental Support; (3) Results of Yeast Dough Practice; (4) The relationship between students' entrepreneurial interest and the results of yeast dough practice; (5) The relationship between parental support and the results of yeast dough practice; (6) The relationship between entrepreneurial interest and parental support and the results of yeast dough practice. The location of the study was at Imelda Tourism Vocational School, Medan. The time of this study was in November 2025. The research population was class XI Culinary Arts students. The sampling technique was random sampling and the number of samples was 40 students. Data were collected using questionnaires (entrepreneurial interest and parental support) and assessment sheets for the results of the practice (results of yeast dough practice). Data analysis techniques were descriptive data, and analysis requirements tests with normality tests and linearity tests as well as hypothesis tests with product moment correlation tests, partial tests and multiple correlations.

The results of the study showed that the level of students' entrepreneurial interest tendency was included in the category of tending to be sufficient at (50) percent, parental support was included in the category of sufficient at (77.50) percent, and the results of yeast dough practice were included in the good category at (87.50) percent. The results of the partial correlation analysis, there was a positive and significant relationship between entrepreneurial interest and the results of yeast dough practice with a partial coefficient value ($r_{yX1X2} = 0.633$) and a calculated $t_{value} > t_{table}$ ($5.041 > 2.023$) at a significance level of 5 percent. There was a positive and significant relationship between parental support and the results of yeast dough practice with a partial coefficient value ($r_{yX2X1} = 0.582$) and a calculated $t_{value} > t_{table}$ ($4.412 > 2.023$) at a significance level of 5 percent. The results of the multiple correlation analysis show that there is a positive and significant relationship between entrepreneurial interest and parental support with the results of yeast dough practice with a coefficient value ($R_{yX1X2} = 0.688$) and a calculated $F_{value} > F_{table}$ ($16.627 > 3.36$) at a significance level of 5 percent.

Keyword: Entrepreneurial Interest, Parental Support, Result of Yeast Dough Practice
