

LIST OF TABLE

Table 2.1. The Differentiation between Textbook and Module	7
Table 2.2 Binary Compounds of Metal and Nonmetal	19
Table 2.3.Binary Compounds of Nonmetal and Nonmetal	19
Table 2.4. Compounds of Polyatomic Ions	20
Table 2.5. Compounds of Polyatomic Ions if Cation has One Oxidation Number	20
Table 2.6. Acid Compounds	21
Table 3.1.Research Design of the Developed Learning Module to Increase Student's Achievement in The Teaching of Oxidation and Reduction Reaction	25
Table 3.2 Validation Criteria	29
Table 4.1. Average Percentage Analysis of Chemistry Materials in Redox Reaction Topic that is Included in the Textbook for Bilingual Class From 4 Publisher	36
Table. 4.2. The Performance of Textbook on The Material Redox Reaction Which is Judged by Chemistry Lecturer, Chemistry Teacher, and Senior High School Students	40
Table 4.3. Normality Test of three schools that were done In trial chemistry learning module	43
Table 4.4 Homogeneity Test of three school that were done In trial chemistry learning module	43

Table 4.5. The Student's Achievement Based on The Pretest on Developed Chemistry Learning Module in the Teaching of Redox Reaction	44
Table 4.6. The Student's Achievement Based on The Posttest-I on Developed Chemistry Learning Module in the Teaching of Redox Reaction	45
Table 4.7. The Student's Achievement Based on The Posttest-II on Developed Chemistry Learning Module in the Teaching of Redox Reaction	46
Table 4.8. The Affectivity of Developed of Chemistry Learning Module Onto Student's Achievement on Teaching of Redox Reaction	50
