

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

1. Based on the student achievement test of cycle I and cycle II by Implementation of group investigation, student achievement in cycle I is 72.18 (65.63%) and cycle II is 80.16 (90.63%) in class VIII-1 of MTs. Islamiyah Londut in factorization algebraic topic.
2. The average score of student responses is 75.53 (83.92%) and it is classified into good category. It means that student think that GI is good and interesting learning strategy that can increase their student outcome in learning process.

5.2. Suggestion

1. For teacher, expected to consider conducting GI strategy in learning process with the suitable topic.
2. For student, expected to use GI strategy in learning that they are expected to be able to think independent, to be able to discuss with friend and to be able in sharing their opinion/idea in front of class.
3. For next researcher, expected to use the research result as comparison matter and to implement GI in the other topic.
