

CHAPTER V

CONCLUSSION and SUGGESTION

5.1. Conclusion

The conclusion of this research are:

1. There is no significant difference of student learning outcomes in class VIII SMP Negeri 1 Tebing Tinggi taught by using word square and crossword puzzle model on plant movements
2. There is no significant difference of retention in class VIII SMP Negeri 1 Tebing Tinggi taught by using word square and crossword puzzle model on plant movements
3. There is no better than both models between word square and crossword puzzle model.

5.2. Suggestion

Based on these result the suggestions that researcher can provide are:

1. The teacher of biology can make word square and crossword puzzle model as alternative in choose the model of learning that is expected to increase students learning outcome and retention.
2. To the next researcher is hoped to be better to do the research because of researcher's experience for implement learning model when study, researchers wa not capable to master the class in whole and influced the research's result, so the next researchs will get more maximum result.
3. Giving reinforcement to students that have increase of learning outcome is very efective to increase students learning outcome.
