

PREFACE

First of all the writer would like to devote her greatest thankfulness to Allah SWT, for his blessing, guidance, strength and loves that He gives in all my life, especially in doing this research, in order that this research can be finished well and on time. The written of this thesis is one of requirement for getting the degree of Sarjana pendidikan in Chemistry Department, Faculty of Mathematic and Natural Science, State University of Medan. The title of this research is "The Influence Of Learning With Experimental Methods Using PAS (Simple Alternative Experimental) To The Learning Outcome And Student's Skill Process in The Electrolyte And Non Electrolyte Solution Subject".

In this opportunity, the writer would like thanks to Ibu Dr. Iis Siti Jahro, M.Si. as thesis supervisor in written of this thesis , for advice, suggestion, guidance and constructive comments from beginning until end of completing this research. Mr. Prof. Albinus Silalahi, M.Si., Ibu Dr. Retno Dwi Suyanti, M.Si, and Ibu Dra. Ani Sutiani, M.Si., as examiner lecturer who had given advice and suggestion for completing this thesis. Bapak Prof. Drs. Manihar Situmorang, M.Sc., Ph.d as academic supervisor who had motivated and guided the writer when lecturing, Bapak Prof. Drs. Motlan, M.Sc, Ph.D as a dean of FMIPA UNMED. And thanks for all lecturer and staff in chemistry department.

The writer also like say thanks to Bapak Drs. H. Amarullah, SH, M.Pd. as ahead master in MAN 2 Model Medan, Ibu Suyati, S.Pd and Dra. Jati Setiasih, M.Si., as chemistry teacher who had help and guiding the writer when do the research and also for the teacher and staff administration in MAN 2 Model Medan who had given opportunity and helpful to the writer when do the research.

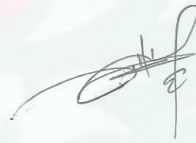

Especially thanks to beloved parents who always give grace, advice, motivation, support and their love, for my sister and brothers who can disappear the exhausted with their joke and all of family who always given passion, support and motivation to the writer. And also thanks to best friend : Arbi's family who always give motivation, Irna Ariani and Rahmi Wardha for long discussion to

finishing this thesis. Writer also say thanks to all of friend in chemistry department especially for Bilingual Chemistry '09.

The writer realize that this thesis is still not being perfect yet therefore the writer hope construct suggestion and critics from the reader for perfection this thesis. The writer hopes this thesis can be useful and give many function to the reader's knowledge especially about subject matter which is researched in this thesis.
