

TABLE LIST

Table 2.1. Role of Instructional Materials for Teacher and Students	10
Table 2.2. The core competence and basic competence of chemistry in curriculum 2013	18
Table 2.3. The Changing paradigm or mindset on curriculum 2013	24
Table 2.4. Litmus paper changes in the state of acids and bases	29
Table 2.5. Some acid-base indicator solution	29
Table 3.1. The design of the research of developed learning module to increase student's achievement	29
Table 3.2. Analysis of suitability the chemistry learning textbooks or module for Senior High School with Curriculum 2013 on teaching of acid and base solution	35
Table 3.3. Questionnaire for Standardizing the Innovative Learning Module of Chemistry on the Topic Acid and Base	37
Table 4.1 The Result of Standard Analysis of Book Code A, B, C, D Contents on the Topic of Acid and Base	44
Table 4.2 The suggested sub-chapter for innovative learning module of acid and base	45
Table 4.3 Average Percentage of Feasibility of Content, Feasibility of Extension, Feasibility of Depth, Feasibility of Design and Feasibility of Language for Books that Analyzed	46
Table 4.4 Type of Innovation in chemistry learning module on the topic of acid and base	51
Table 4.5. The Result of Questionnaire Checklist of Module Standardization by Chemistry Lecturers, Teachers and Students	55
Table 4.6. The average and standard deviation of students' achievement in pretest	58
Table 4.7. The average and standard deviation of students' achievement in posttest-1	60

Table 4.8. The average and standard deviation of students' achievement in posttest-2	61
Table 4.9. The Average of the effectivity percentage in student's Achievement	62
