

LIST OF TABLE

	Page
Table 2.1. Table of main competency and basic competency in Chemistry for Grade X in Curriculum 2013	12
Table 2.2. The different between KTSP and Curriculum 2013	15
Table 2.3. The different between Strong Electrolyte and Weak Electrolyte Solution	24
Table 3.1. The research design of the development of innovative learning module	31
Table 3.2. Questionairre for standarizing innovative learning module	35
Table 4.1. Description of Bilingual Chemistry text book that are include in the Survey	40
Table 4.2. The Percentage Average of Suitability of Description Material for Analyzed of the Textbooks	43
Table 4.3. Type of Innovative in Chemistry Learning Module on the Topic of Electrolyte and Non Electrolyte Solution	47
Table 4.4. The performance of textbook on the material electrolyte and non electrolyte solution which was judged by chemistry lecturer, chemistry teacher and students	49
Table 4.5. Average and Standard Deviation of Student's Achievement in pretest	50
Table 4.6. Average and Standard Deviation of the Student's Achievement in Posttest-1	51
Table 4.7. Average and Standard Deviation of the Student's Achievement in Posttest 2	52
Table 4.8. Normality test of three school that were done in trial chemistry learning module	53
Table 4.9. Homogeneity test of three school that were done in trial chemistry learning module	53
Table 4.10. Data t-test based on student's achievement in posttest 2 for high group in experiment and control class	53

Table 4.11. The t-test data based on student's achievement in posttest 2 for low group in experiment and control class	54
Table 4.12. Data t-test based on student's achievement in posttest 1 for high group in experiment and control class	55
Table 4.13. Data t-test based on student's achievement in posttest 1 for low group in experiment and control class	55
Table 4.14. The Effectivity percentage of chemistry learning module in Electrolyte and Non Electrolyte solution	56
