

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

After conducted the research and done some analyzing process of research data result, the researcher concluded:

1. The students achievement who were taught by virtual laboratory had significant different with the students achievement who were taught by real laboratory on the learning of acid-base titration
2. The students character of responsibility and activeness who were taught by virtual laboratory media had improve

5.2 Suggestion

Considering to the result of the research, the researcher suggests:

1. For chemistry teacher, it is suggested to use virtual laboratory as a learning media on the learning of acid-base titration
2. For chemistry teacher, this virtual laboratory media is good to be used also in improving the students character in responsibility and activeness on the learning of acid-base titration
