

CHAPTER V CONCLUSION AND SUGGESTION

A. Conclusion

This study conducted by action research design. There is an improvement of the students' achievement in reading narrative text if it was taught by using BDA technique. BDA technique is one of an effective technique that is useful to enhance the reading comprehension. This technique is effective because it activates the students' prior knowledge while their reading the text. Moreover each step in BDA technique is simple to be implemented in the classroom. In the first step, before reading, the students will be asked to use their prior knowledge about the topic by looking to the title of the text. They also make the predictions about what the text will be about and do the scanning before they start to read the text. In the second step, during reading, the students will monitor their understanding by questioning, thinking about, and reflecting on the ideas and information the text while they are reading the text. This step can also help the students understand the meaning of unfamiliar word and get the main idea from the text. In the last step, after reading, the students will do the reflection after reading the text and also connect what they have read to their own experience and knowledge.

It is showed from the mean of the students' score in three tests: test I (50.95), test II (70.93) and test III (91.57). It means that the use of BDA technique could improve the students' achievement in reading narrative text. This condition is proved by the observation sheet, interview sheet, and diary notes that indicate

improvement in students' achievement in reading narrative text. It is shown that most of students became more active and more active working in groups and it is strengthened by the improvement of their reading test scores.

B. Suggestion

Based on the result of this study, the use of BDA technique could improve the students' achievement in reading narrative text. The following suggestions are offered:

1. For the students, to use BDA technique while reading so they can comprehend the text easily.
2. For the further researcher, to apply BDA technique so that they can improve the students' achievement in reading comprehension.

For all the readers, this research brings them into good understanding on the way to improve the students' reading comprehension through BDA technique.
