

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the quantitative data, the writer found out that the students' scores increased during the cycles. It can be seen from the improvement of the mean in test I was 53.47, the mean of test II was 63.05 and the mean of test III was 75. Moreover, the qualitative data showed that the students were more interested and enjoyable in procedure texts through Word Webbing Technique. Therefore, it can be concluded that the application of Word Webbing Technique can improve students' achievement in writing procedure texts.

A. SUGGESTIONS

Related to the writer's research, some suggestions are pointed out as follows :

- a. For the English Teacher, it's better to apply Word Webbing Technique in writing Procedure Texts in teaching learning process because it's proven that this technique can improve the students' achievement in writing procedure texts easily and creatively.
- b. For the readers who are interested with this study must explore the further knowledge to enlarge the understanding in writing Procedure Texts and search another reference because it can give good development.
