

## CHAPTER V

### CONCLUSION AND SUGGESTIONS

#### A. CONCLUSION

In analyzing data, the mean of students' score for the first competency test was 42,5 for the second competency test was 61,25 and for the third competency test was 85 and the total percentage of improvement from the first competency test to the third competency test was 68,75%. It means there is an improvement on the students' speaking in expressing opinions, agreement disagreement together with the arguments by using short movie media. The result showed the mean of the second cycle was higher than the first cycle. Thus, the usage of short movie media can improve students speaking achievement.

#### B. SUGGESTIONS

The result of this study showed that the use of short movie media could improve students' speaking achievement. The following suggestions are offered:

1. To English teachers, it is better to use short movie media in teaching speaking because the students can express their ideas better and they can practice their speaking directly and stimulate students' critical thinking.
2. It is also suggested to the readers who infers for further study (university students) related to this research should explore the knowledge to enlarge their understanding about how to improve speaking skill and search another reference.
