

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. CONCLUSIONS

Based on the result of the study there was an improvement on the students' writing descriptive text by using Questioning Technique. The improvement could be seen from the mean of students' namely: the mean of Test I (59.86) , the mean of test II (67.80) and the mean of test III (74.63). Beside that, the students were more enjoyable and interested in learning writing descriptive text by using Questioning Technique.

Through the observation sheets, questionnaire, and diary notes, the improvement in learning result by applying questioning technique was also proved. Therefore, the apply questioning technique could significantly improve the students' writing achievement in writing descriptive text. It is showed by their enthusiasm and respond in writing descriptive text in the two cycles.

B. SUGGESTIONS

Based on the result of this study, the use of the questioning technique could improve the students' writing achievement in descriptive text. The following suggestions are offered:

1. to the students, to use questioning technique while writing in the class so they can write descriptive text easily.
2. to the teachers, to apply questioning technique so that they can improve their students' achievement in writing descriptive text; and

3. to all the readers, may this research bring them into good understanding how to improve the students' writing ability through questioning technique.
