

BAB V

CONCLUSION AND SUGGESTION

A. Conclusion

The analyzing of the result of this study was done by applying technique of data analysis which were students' score interview, observation sheet, questionnaire and diary notes. After analyzing the data from the students score, conclusion was drawn as following : (1) it was found that the students' score increased from the from the orientation test cycle I and cycle II.

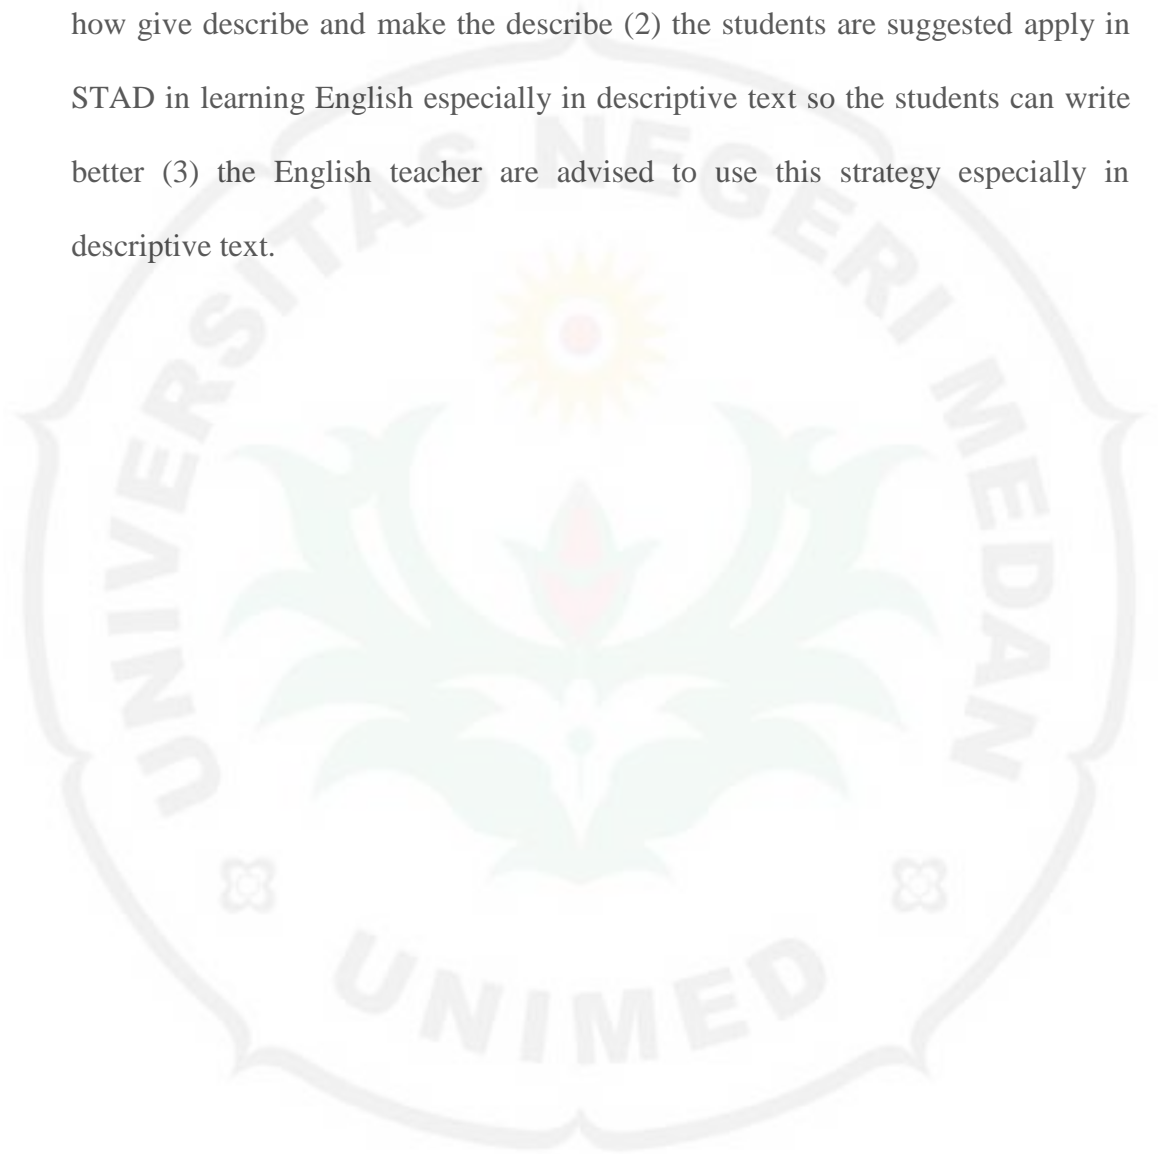

It means that there was an improvement on the students achievement in writing descriptive text by using STAD technique. It was seen from the improvement of mean starting from orientation (56,7 %), cycle I (68,9%), cycle II (76,9 %) the students score was improved continuous from the first meeting until the test of cycle II. Thus STAD on students achievement in descriptive place worked well.

Besides that the discussion in STAD gave them opportunity to all the students . In each group to participate by giving their opinion in a case. More ever, students could construct more powerful identification of place on their side belonging. Briefly, this study of improving students writing achievement in descriptive text by using STAD technique is improve.

B. Suggestion

In relation to the conclusion , it is suggested that : (1) applying STAD technique in writing descriptive text is very helpful by STAD the students About

how give describe and make the describe (2) the students are suggested apply in STAD in learning English especially in descriptive text so the students can write better (3) the English teacher are advised to use this strategy especially in descriptive text.
