CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the research findings, the researcher concludes that there is a significant effect of using Frayer Model on Students' Vocabulary Mastery since the students' mastery in vocabulary by using Frayer Model is higher than taught without using Frayer Model (by conventional Method). It was proven statistically with t- observed > t-table ($5.41 > 2.00$; $df = 58$, $\alpha = 0.05$). Therefore, alternative hypothesis is accepted and null hypothesis is rejected.

B. Suggestions

It is important that the method in teaching and learning process should be enjoyable so the students will be encourage in learning.

1. The English teachers should try to apply teaching vocabulary by using Frayer Model. By using Frayer Model in teaching vocabulary, the teacher can facilitate the student to learn independently.

2. The students should apply learning vocabulary by using Frayer Model in a group or individually to make them have deeper understanding of a word.

3. Other researchers should try to apply teaching vocabulary by using Frayer model on different level of learners through different topics to prove the
