

CHAPTER V CONCLUSION AND SUGGESTIONS

A. Conclusion

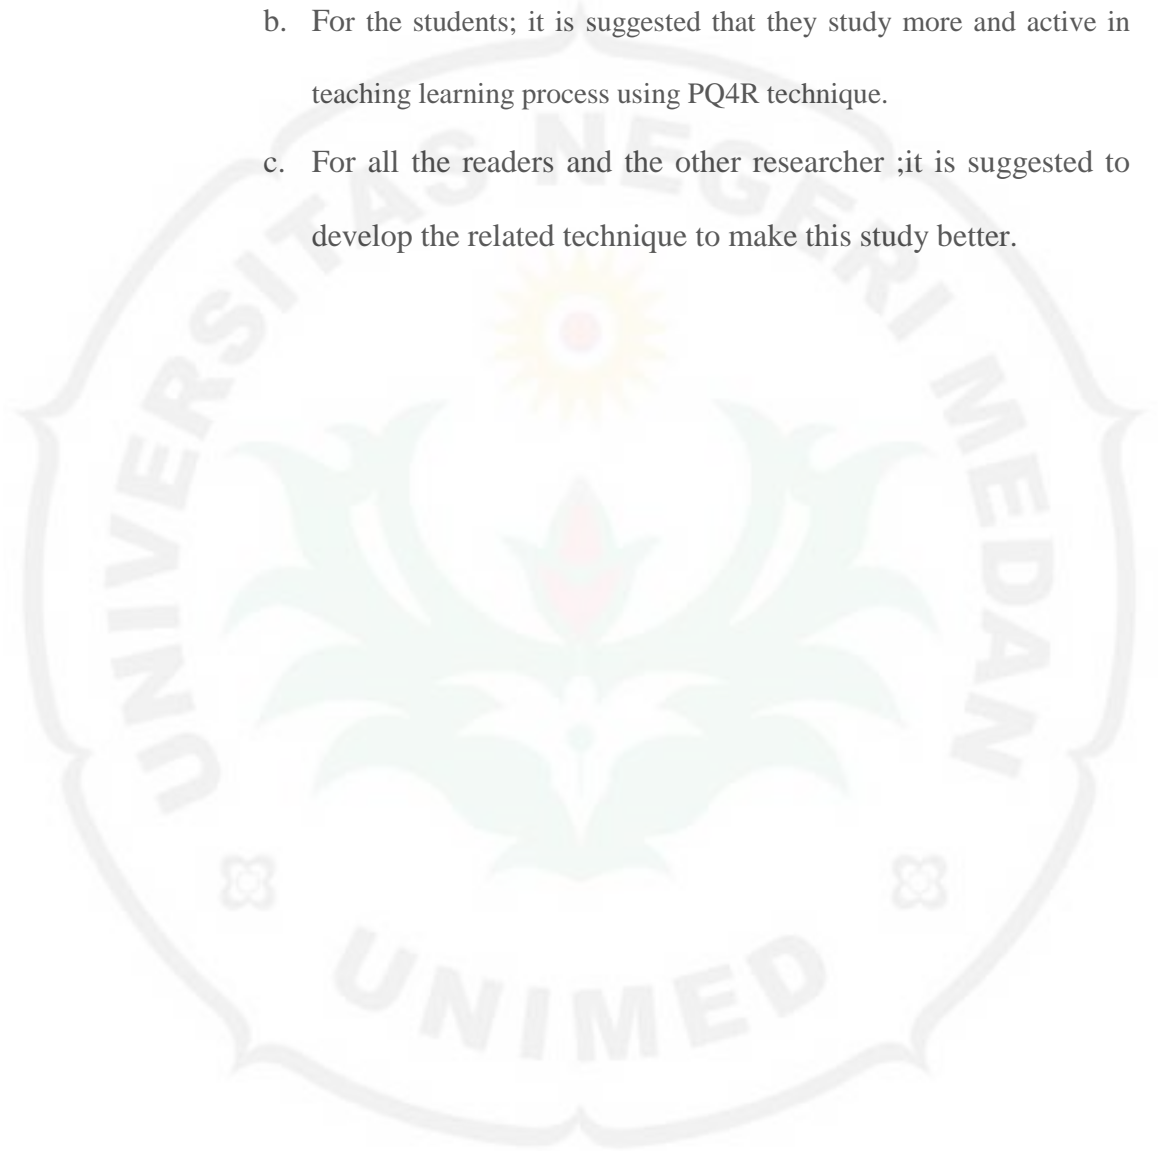

After analyzing the data, it is found out that the students' reading achievement improved from the test I cycle I into the cycle II test III. It means that there was an improvement toward students' reading achievement by applying PQ4R technique. It was shown from the improvement of the mean of the students score namely the mean of the cycle I test was 53.62, and the mean of the cycle II test was 73.28. It can be stated that the score continuously improved from test I cycle I to cycle II test. Therefore, it could be concluded that PQ4R Technique can improve students' achievement in reading comprehension. Beside the mean of the score, there was percentage of the students who got the score above 70. In the cycle I test was 20.00% (7 students) and in cycle II test was 77,14% (27students). It means that there was an improvement of the students in their reading comprehension about 57.14% compared with the first test and for the second test.

B. Suggestion

The result of this study shows that the uses of PQ4R technique could enlarge or improve the students' achievement in reading comprehension in narrative text. The following suggestions are offered:

- a. For the English teacher; is better to use PQ4R technique since it could make teaching and learning process more interesting and enjoyable.

- b. For the students; it is suggested that they study more and active in teaching learning process using PQ4R technique.
- c. For all the readers and the other researcher ;it is suggested to develop the related technique to make this study better.
