

## **CHAPTER V CONCLUSION AND SUGGESTION**

### **A. Conclusion**

After analyzing the data, it was found that the average scores of students in every test kept improving. It means that there was a significant improvement on the students' reading achievement in reading report text by using Think Pair Share strategy. It can be seen from the improvement of mean of the students' score namely: the mean of orientation test (52,75) increased to the mean of cycle I test (66,75) and to the cycle test II (80,25). The score continuously improved from the first test to the third test.

### **B. Suggestion**

The result of this research showed that the use of Think Pair Share strategy improved students' reading achievement in report text. In relation to conclusion above, some points are suggested, as follows:

1. The English teacher are suggested to use Think Pair Share strategy as the effective strategy to stimulate the students' learning reading spirit and interest in the reading teaching – learning process.
2. For the students, it is suggested to use Think Pair Share strategy because this strategy trains the students to share their knowledge to their friends. Think Pair Share strategy also trains the students to think logically about a topic.

3. For the readers who are interest for further study (university students) related to this research should explore the knowledge to enlarge their understanding about how to improve reading report text and search another reference.
