CHAPTER V
CONCLUSION AND SUGGESTIONS

A. Conclusion

After analyzing the quantitative data, the writer found out that the students' scores increased during the cycles. It can be seen from the improvement of the mean in test I was 64.44, the mean of test II was 68.92, and the mean of test III was 74.15. Moreover, the qualitative data showed that the students were more interested and enjoyable in speaking narrative through Snowball Throwing Model. Therefore, it can be concluded that the application of Snowball Throwing Model can improve the students' speaking achievement in narrative text.

B. Suggestions

Related to the writer's research, some suggestions are pointed out as follows:

1. For the teaching learning process, it's better to apply Snowball Throwing Model in teaching learning process because it's proven that this technique can improve the students' speaking achievement in narrative text easily and creatively.

2. For the students, it's suggested that students should learn well the activities of Snowball Throwing Model in order to make them apply themselves to be able learn vocabulary and speaking effectively
