

## **CHAPTER V CONCLUSIONS AND SUGGESTIONS**

### **A. Conclusions**

Based on the results of the data analysis, it is found that the Semantic Clustering Technique significantly affect the students' vocabulary mastery. The using of Semantic Clustering Technique enables the students to master of vocabulary of English. On the other hand, the application of Semantic Clustering Technique in teaching vocabulary is more effective because the result show that students' score is higher after treatment. Therefore, it is concluded that hypothesis is accepted.

### **B. Suggestions**

In line with the conclusions and the result of the research, some suggestions are stages as the following:

1. Theoretically : It is useful for the teachers to improve the quality of students' vocabulary and for the researchers to use this study as reference for next researches
2. Practically: It is useful to improve the students' vocabulary and widen their horizon about the function of Semantic Clustering Technique in affect their vocabulary mastery
