

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The main objective of this study was to determine whether there was any improvement of students' comprehension achievement in reading narrative text in the group using sequence chain strategy.

Based on the result of this study, the researcher found that the students' comprehension achievement in reading narrative text taught by using sequence chain strategy was higher than the students taught by using QAR. It was indicated from analyzing the data statistically that the result of calculation of t-test that t-observed value 3,3 was higher than t-table value 1.67 at the level of significant of 0.05, which implies that the alternative Hypothesis (H_a) was accepted.

B. Suggestions

The study showed that the using sequence chain strategy could improve the students' comprehension achievement in reading narrative text. Based on the conclusion given, the writer suggests that:

- 1) The teacher to use strategy in teaching comprehension in reading narrative text specially sequence chain because students experience the new atmosphere in learning and they more motivated and interested in learning narrative text.

- 2) Those who are interested in carrying out further research related to this study providing them with some valuable information needed.
