

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the data in the previous chapter, the writer would like to draw a conclusion that the tenth grade students of SMA Santo Yosep Aekkanopan still made many errors in their recount writing.

1. From the data analysis the researcher found that most common error in grammatical agreement made by the students in recount writing made by the students is selection (90 or 45%) with 73 cases of subject-verb agreement errors and 17 cases of pronoun reference noun agreement errors. The second error that the students made is omission (74 or 37%) with 58 cases of subject verb agreement errors and 16 cases of pronoun reference noun agreement. The third Error that the students made is order (19 or 9.5%) with 15 cases of subject verb agreement errors and 4 cases pronoun reference noun agreement errors. The last errors that the students made is omission (17 or 7.5%) with 15 cases of subject verb agreement errors and 2 cases of pronoun reference noun agreement errors.
2. From that data analysis the researcher found that the causes of grammatical agreement on students' recount writing are Strategy of communication and assimilation with 63 or 31.5%, overgeneralization with number of errors are 62 or 31%, interferences with 52 or 26%, and performance error with 23 or 11.5%.

B. Suggestions

After the writer carried out the research, he would like to give suggestions related to the result of this research. Hopefully it can be applied easily in teaching learning activity and decrease the errors.

1. The teachers should keep teaching and explaining more to students how to use the appropriate grammar on writing recount text especially in using grammatical agreement.
2. Writing is a skill which needs a process and practice. Therefore, the students should practice writing started from the simplest one such as writing a daily activity or writing their past experience like recount text and learn more about applying grammatical agreement on their writing.
3. This research is not too complete yet and needs additional explanation. It still need elaboration from other researchers who are interested on studying grammatical agreement also but of course with different genre and sample of population.
