

ABSTRACT

Hutabarat, Handika Saputra. 2103321017. *The Effect of Using Question Answer Relationship Strategy on Students' Achievement in Reading Narrative Text*. A Thesis. English Department. Faculty of Languages and Arts. States University of Medan. 2015.

The objective of this study was to investigate whether Question Answer Relation Strategy significantly affected on students' achievement in reading narrative text. This study was an experimental research design. The population of this study was grade VIII students of SMP Negeri 3 Indrapura with the total number of students was 60 as samples and all of the students was taken by using random sampling. The students were divided into two groups, namely experimental and control group. The experimental group was taught by using Question Answer Relationship Strategy, while the control group was taught by using Conventional Technique. The instrument of collecting data was multiple choice tests which then divided into pre-test and post-test. To obtain the result of the reliability of the test, the researcher used the Kuder Richardson formula (KR-21). The result of the calculation showed that the reliability of the test was 0.64, which means that the reliability of the test is high. The data were analyzed by using t-test formula. The result of the analysis showed that t_{value} is higher than t_{table} ($3.30 > 2.00$) at the level of significance 0.05 with the degree of freedom (df) 58. It means that there is a significant effect of using Question Answer Relationship Strategy on the students' achievement in reading narrative text.
