

ABSTRACT

Pratiwi, Siska. Process of a Schizophrenic's Dialogues in a Beautiful Mind Movie. Faculty of Language and Art. State University of Medan. 2013.

This study concerns with the analysis of transitivity system which focusing on the types of process uttered by the schizophrenic character in A Beautiful Mind movie, John Nash. This study was conducted by using descriptive qualitative method. There are six types of process in transitivity system. The results of data analysis show material process 44.67%, mental process 18.83%, relational process 28.03%, behavioral process 1.17%, verbal process 4.53% and existential process 2.77%. The most dominant process is material process, that is the process which indicates action; activities and events, things happen and people or other actors do things or make them happen. The indication reflects Nash's activities with real people and hallucination people especially when his hallucination friends: Charles, Parcher and Marcee. Nash intensively met them so that he talked much with them and kept their memories in his mind.

Keywords: schizophrenia, transitivity, process, movie
