

## CHAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. Conclusions

After identifying the process in transitivity system and analyzing them, some conclusions are made in the followings:

1. All types of process occurs in Nash's dialogue in *A Beautiful Mind* movie, namely material process, mental process, relational process , behavioral process, verbal process and existential process.
2. The dominant process in Nash's dialogue from *A Beautiful Mind* movie is material process (306 clauses, 44.67%), that is the process which indicates action; activities and events, things happen, and people or other actors do things or make them happen. Then, it is followed by relational process (192 clauses, 28.03%), mental process (129 clauses, 18.82%), verbal process (32 clauses, 4.53%), existential process (19 clauses, 2.77%) and behavioral process (8 clauses, 1.17%)
3. The reason why material process is the dominant process because it reflects Nash's activities with real people and hallucination people especially when his hallucination friends: Charles, Parcher and Marcee. Nash intensively met them so that he talked much with them and kept their memories in his mind.

## B. Suggestions

Based on the conclusions given, the following suggestion are needed to be considered:

1. It is suggested for those students who are studying language and discourse analysis to use transitivity theory in observing further study.
2. It is expected that the future research can analyze other aspects of transitivity system such as the participants and circumstances.
