

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Having analyzed the data presented in the previous chapter, the researcher takes some conclusions as follows:

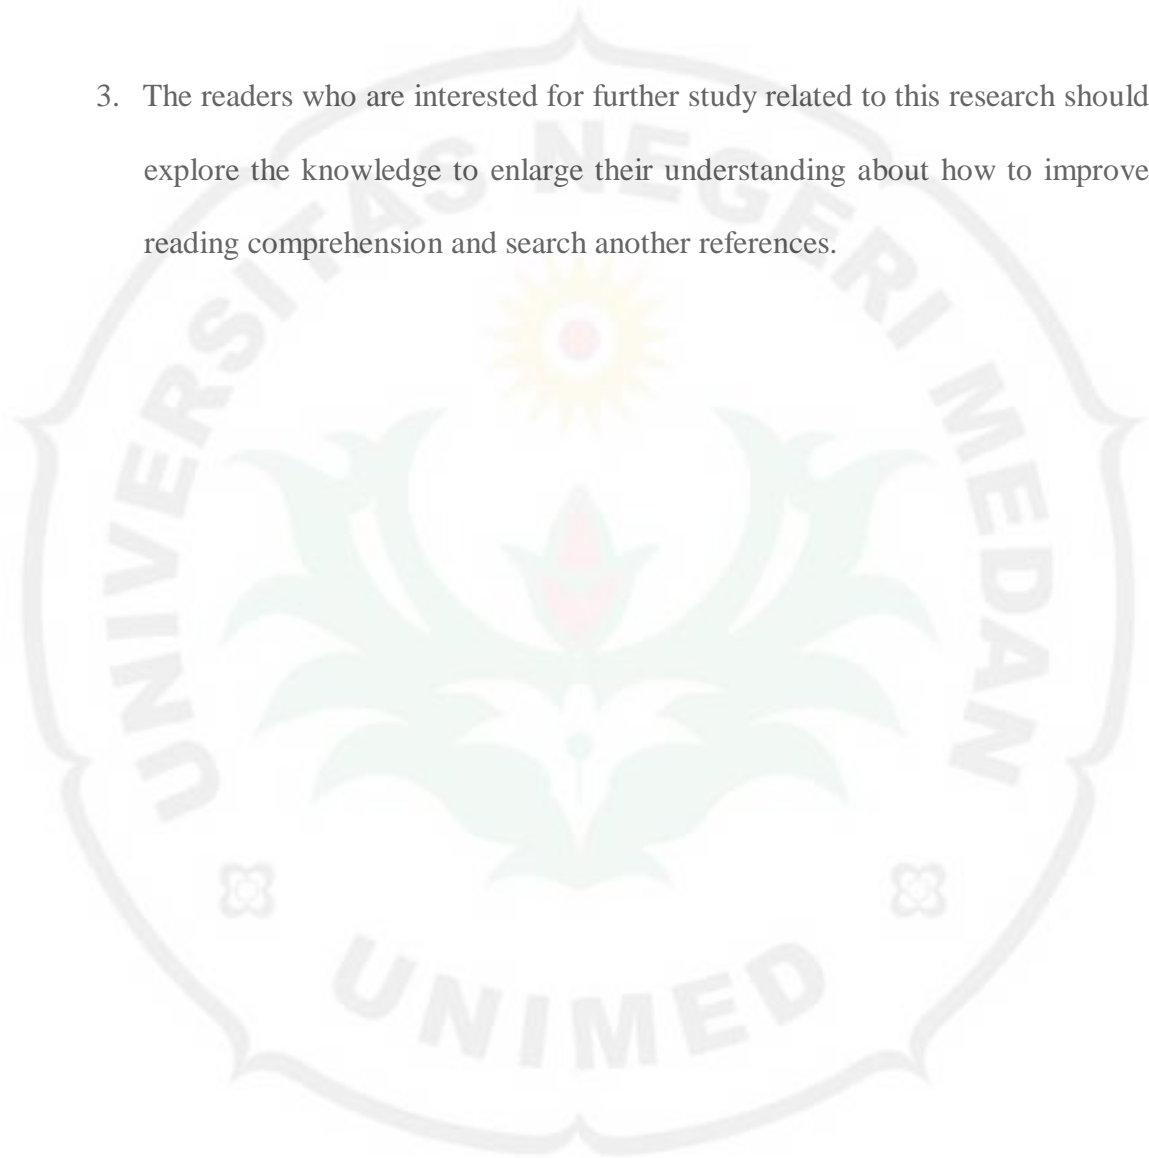

1. Based on the result of the data analysis, it is concluded that using Cooperative Integrated Reading and Composition Technique has a significant effect on student's reading comprehension (t-observed > t-table at the level of significance 0.05 and null hypothesis is rejected.).
2. Students who were taught by using Cooperative Integrated Reading and Composition Technique showed better improvement.

B. Suggestion

Based on the conclusions above, the result of the findings contribute valuable suggestions for those who are interested in teaching reading comprehension

1. Teaching by applying CIRC technique is proved effective in upgrading student's reading comprehension, so the researcher suggest that English teacher should apply CIRC technique in teaching reading comprehension.
2. Students should apply this learning method in comprehending a text because it can make students more easily to understand the text.

3. The readers who are interested for further study related to this research should explore the knowledge to enlarge their understanding about how to improve reading comprehension and search another references.
