

## **CHAPTER V CONCLUSIONS AND SUGGESTION**

### **A. Conclusions**

After analyzing the data, it can be concluded that there was 15 structure of conversation. In the conversation of Manyapai Boru ceremony session there was two structure exchanges. In the next session, the conversation in Mangaririt Boru ceremony has seventh exchange structure and in the last session called Patobang Hata ceremony was give six structure exchange. Those are k2, k1, k2f, k1f, a1, and a2. In this conversation, writer was also found the dynamic exchange they were ch, cl, rcl, cf, rcf and ch.

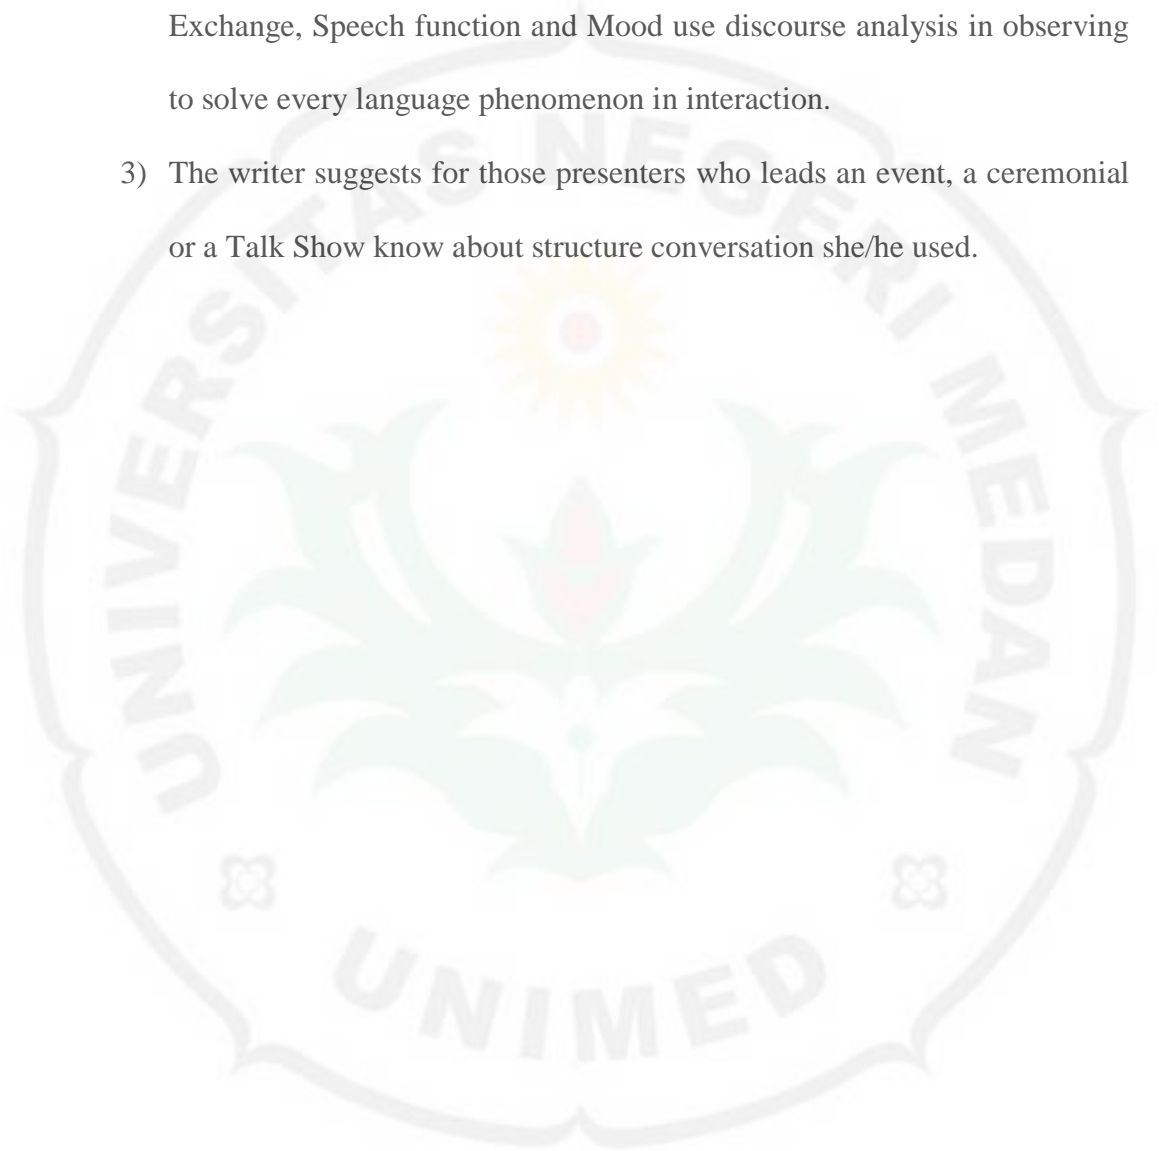

The result of the analysis show about the structure of conversation which used by the King of the ceremony is k1 (primary knower) where primary knower has function to provide information to the hearer in the ceremony of this conversation.

### **B. Suggestion**

Based on the conclusions given, the following suggestions are needed to be considered in conducting the related research:

- 1) The writer suggests the students and lecturer who want to study about interaction should learn not only grammatically correct sentence but also pattern of exchange.

- 2) The writer suggests the researcher who want to research about Structure Exchange, Speech function and Mood use discourse analysis in observing to solve every language phenomenon in interaction.
- 3) The writer suggests for those presenters who leads an event, a ceremonial or a Talk Show know about structure conversation she/he used.
