

## **CHAPTER V CONCLUSION AND SUGGESTIONS**

### **A. Conclusion**

The result of calculation t-test shows that the t-observed (2.29) > the t-table (1.994). It means that the alternative hypothesis  $H_a$  is accepted. So, it is concluded that Imaging Organizer strategy affects the students' ability in writing descriptive texts.

### **B. Suggestions**

As the result of the study, it is suggested that:

1. The English teachers should use the strategy in their attempt to improve students' ability in writing descriptive text, especially for the students who have difficulty to explore ideas, to think of what to write on the writing substantial.
2. Since this research is limited to the investigation of the Imaging Organizer on writing and how the Imaging Organization can be developed is not known, it is suggested that a research should be done on writing development.
