ABSTRAK

ALI PERDANA KABRETA. NIM. 509321008. "Pengaruh Perhatian Orangtua Terhadap Disiplin Belajar Dalam Kaitannya Dengan Hasil Belajar Siswa SMK Negeri 1 Merdeka Berastagi Program Keahlian Teknik Mekanik Otomotif". *Skripsi.* **Fakultas Teknik Universitas Negeri Medan, Medan,2014.**

Penelitian ini bertujuan untuk mengetahui besarnya pengaruh perhatian orangtua terhadap disiplin belajar dan dengan pengaruh disiplin belajar akan mempengaruhi hasil belajar siswa khususnya mata pelajaran program keahlian teknik mekanik otomotif. Populasi dalam penelitian adalah seluruh siswa SMK Negeri 1 Merdeka Berastagi Program Keahlian Teknik Mekanik Otomotif yang berjumlah 364 Orang. Sampel penelitian diambil 25% dari jumlah populasi menggunakan Teknik Sampel Cluster Random Sampling, total sampel yang diambil adalah sebanyak 92 siswa. Data penelitian ini dikumpulkan dengan menggunakan angket untuk variabel perhatian orangtua dan disiplin belajar sedangkan untuk hasil belajar menggunakan dokumentasi. Pada angket perhatian orangtua reliabilitasnya sebesar 0,758 tergolong tinggi, pada disiplin belajar reliabilitasnya sebesar 0,751 tergolong tinggi. Teknik analisis data yang digunakan adalah analisis korelasi product moment. Hasil analisis menunjukkan bahwa terdapat pengaruh yang berarti antara perhatian orangtua terhadap disiplin belajar ($r = 0{,}9820$), terdapat pengaruh yang berarti antara disiplin belajar terhadap hasil belajar ($r = 0{,}9886$).

Kata Kunci : Perhatian Orangtua, Disiplin Belajar, Hasil Belajar
.

ABSTRACT

ALI PERDANA KABRETA. NIM. 509321008. "Parent attention influence to been disciplined Studying In its Bearing With Students Learned Result SMK Negeri 1 Merdeka Berastagi Programs Mechanical Tech membership Otomotif ". Faculty of Engeneering State University of Medan. Medan,2014.

This research intent to know big parent attention influence to been disciplined studying and with disciplined influence studies will regard student studying result in particular tech forte program subject mechanical otomotif. Population in observational is exhaustive SMK'S student Negeri 1 Merdeka Berastagi Programs Mechanical Tech membership Otomotif that 364 Person. Observational sample to be taken 25% of total population utilizes Cluster Random's Sample Tech Samplings, full scale sample which is taken is as much 92 students. This observational data gathered by use of questionnaire for variable parent attention and studying discipline whereas for result studies to utilize documentation. On parent attention questionnaire reliabilitas as big as 0,758 tall ranks, on reliabilitas learned discipline as big as 0,751 tall ranks. analisis's tech data that is utilized is analisis product moment's correlation. analisis's result points out that exists meaning influence among parent attention to been disciplined studying (r = 0,9820), available influence which means among studying discipline to usufruct studying (r = 0,9886).

Key word: Parent attention, Learned discipline, Learned result
