

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the result of the data analysis and discussion, the researcher concludes that use of NHT Technique affects the students' achievement in reading descriptive text, since the score of the students who were taught by using NHT Technique is higher than that using Conventional Technique. Therefore, the formulated hypothesis "The students' achievement taught by using NHT Technique in reading descriptive text is higher than those taught by Conventional Technique" is accepted. This shows by applying NHT Technique significantly affects students' achievement in reading descriptive text This is approved by the data analysis results in which the $t_{observed}$ (3.57) is higher than t_{table} (1.99) at the level of significance (P) 0.05.

B. Suggestion

Based on the conclusion above, the researcher gives some suggestions for those who are interested in teaching reading as follows:

1. English teachers are suggested to use NHT Technique in their teaching learning process, especially in teaching reading descriptive text because it can help student understand and get the meaning of the material more easily in which by using NHT the students work in group to discuss and solve the problem which is given in the text.

2. Other researchers, who want to study more about NHT Technique, this research could be advisable reference in conducting similar language skills reading with different genre.
