

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

The conclusions of this study can be drawn as follow:

1. There are 8 from 16 Tenor configurations realized in Setya Novanto's utterances in the conversation related to Freeport issue, they are :

[Formal/Equal/Frequent/+Affect] with 1 frequency

[Formal/Equal/Frequent/-Affect] with 21 frequencies

[Formal/Equal/Infrequent/-Affect] with 2 frequencies

[Formal/Unequal/Frequent/-Affect] with 2 frequencies

[Formal/Unequal/Infrequent/-Affect] with 1 frequency

[Informal/Equal/Frequent/+Affect] with 3 frequencies

[Informal/Equal/Frequent/-Affect] with 67 frequencies

[Informal/Unequal/Frequent/-Affect] with 1 frequency

2. The Tenor configurations of Setya Novanto imply language deviation toward Indonesia President by uttering inappropriate personal pronoun and dubbing him an epithet. In term of linguistic features uttered, he uses ellipsis, figurative meanings, and borrowing words in this Freeport issue conversation because in fact, he had close relationship

3. with his interlocutors. Thus it does not become a matter to him uses those terminologies. The common language style used by him is casual one because he oftentimes attaches laughter expression and interjection into his utterances.
4. The most frequent Tenor configuration used by Setya Novanto is [Informal/Equal/Frequent/-Affect] because he commonly talks about his experiences with some important people in Indonesia and relates it to his next plan persuading Indonesia President to expand the contract expansion of Freeport Company in Indonesia.

#### **B. Suggestion**

Based on the conclusions above, the suggestions can be stated as follow:

1. To reveal the involvement of participants in a discourse, it is suggested for the analyst to analyze the Tenor configurations realized in it.
2. Before analyzing Tenor configurations in a discourse, it is suggested for the analyst to know the field of the context discussed.
3. For one(s) who want to conduct the similar analysis, it is suggested that the analyst should have had a good comprehension about Systemic Functional Language (SFL) before conducting it because the findings later are related with the use of linguistic units.
