

## ABSTRAK

**Hodijah Pulungan.** Pengaruh Kebijakan Pembangunan Fasilitas Publik Terhadap Pertumbuhan Ekonomi Kabupaten Gayo Lues Provinsi Aceh.

Penelitian ini bertujuan untuk mengetahui pengaruh kebijakan pembangunan fasilitas publik terhadap pertumbuhan ekonomi, yaitu fasilitas publik (jalan, listrik, air bersih, irigasi, pendidikan dan kesehatan). Menggunakan model Canning dengan analisis data *time series*. Diperoleh hasil bahwa kebijakan pembangunan fasilitas publik jalan, listrik, air bersih, irigasi, pendidikan, kesehatan memiliki pengaruh positif yang signifikan terhadap pertumbuhan ekonomi kabupaten Gayo Lues provinsi Aceh. Pengaruh kebijakan pembangunan fasilitas publik terhadap pertumbuhan ekonomi bersifat inelastis (*inelastic*) untuk fasilitas publik (jalan listrik, irigasi, pendidikan, kesehatan), sedangkan untuk fasilitas publik air bersih bersifat elastis. Pengaruh kebijakan pembangunan fasilitas publik terbesar adalah air bersih dengan koefisien 9.83.

Kata kunci : Pertumbuhan ekonomi, fasilitas publik, jalan, listrik, air bersih, irigasi pendidikan, kesehatan, OLS.

## **ABSTRACT**

**Hodijah Pulungan, 8146162006.** *Influence Policy of Facilities Publik Development on Economic Growth of Gayo Lues district of Aceh Province.*

*This aims of this study to determine the effect of influence policy of facilities public development which represented road, electricity, clean water, irrigation, education and health on the economic growth of Gayo Lues district of Aceh Province and type of facilities public that provide the greatest elasticity. With the development model Canning were analyzed using time series. The result indicate that development of road facilities public, electricity, clean water, irrigation, education and health canal have a significant positive influence on economic growth of Gayo Lues district of Aceh Province. Effect of policy of facilities publik development on economic growth is not elastic (inelastically) for the entire facilities public (road, electricity, irrigation channels, education) but for clean water is elastic. Effect of mayor policy of facilities public development is the clean water with coefficient 9.83.*

*Key word : Economic growth, facilities public, long road, electricity, clean water, irrigation channels, education, health, OLS.*
