Pemilihan sampel dalam penelitian ini dilakukan dengan tehnik proporsional random sampling dengan cara undian.

Dari hasil penelitian diperoleh persamaan regresi linear berganda $Y=21,37720 + 0,537245X_1 + 0,166948X_2$. Berdasarkan uji hipotesis secara parsial diperoleh hasil perhatian orang tua berpengaruh secara positif nilai t_{hitung} sebesar 8,653 dan tingkat probabilitas 0,0000 dan hasil uji hipotesis parsial motivasi belajar terhadap prestasi belajar menunjukkan hasil berpengaruh secara positif dengan nilai t_{hitung} sebesar 2,446 dengan tingkat probabilitas sebesar 0,0165. Sedangkan untuk uji hipotesis secara simultan diperoleh hasil perhatian orang tua dan motivasi belajar berpengaruh secara positif dengan nilai F_{hitung} sebesar 68,806 dengan tingkat probabilitas sebesar 0,0000. Berdasarkan uji koefisien determinasi diperoleh nilai R^2 sebesar 0,6266 yang artinya perhatian orang tua dan motivasi belajar memberikan kontribusi terhadap prestasi belajar ekonomi sebesar 62,66% sedangkan sisanya dipengaruhi oleh variabel lain yang tidak dibahas dalam penelitian ini.

Kesimpulan dari penelitian ini adalah ada pengaruh perhatian orang tua dan motivasi belajar secara positif dan signifikan terhadap prestasi belajar siswa kelas X mata pelajaran ekonomi SMA Swasta Prayatna Medan T.P.2015/2016.

Andri Azhari Artin. NIM.7123341011. The Influence of Attention Parents and Learning Motivation toward Student Learning Achievement on Class X of Economic Subjects SMA Swasta Prayatna Medan T.P.2015/2016. Skripsi. Department of Economic Education. Study Program of Economic Education faculty of Economics, State University of Medan 2016.

The problem in this research is the low learning achievement. This research is aims to find out : 1) The Influence of Attention Parents toward Learning Achievement, 2) The Influence of Learning Motivation toward Learning Achievement, 3) The Influence of Attention Parents and Learning Motivation toward Student Learning Achievement of Economics on Class X SMA Swasta Prayatna Medan T.A.2015/2016 with population of 243 students and with a sample of 85 students. in this research are 77 students. Selection of the sample this study was done by using proportional random sampling.

From the results obtained by multiple linear regression equation $Y=21,37720 + 0,537245X_1 + 0,166948X_2$. Hypothesis partially based on test results obtained positive attention parents effect t_{count} of 8,653 and a probability level of 0,0000 and the results of hypothesis testing partial learning motivation toward learning achievement showed the results were affected positively by t_{count} of 2,446 with a probability level of 0,0165. As for the simultaneous hypothesis test results obtained attention parents and learning motivation were affected positively by the calculated F_{count} of 68,806 with a probability level of 0,0000. Based on the obtained coefficient determination R^2 value of 0,6266 which means attention parents and learning motivation contribute to the achievement of economic study while the remaining 62,66% influenced by other variables that are not addressed in this study.

It is concluded that there are attention parents influences and learning motivation positive and significant effect on learning achievement of economic class X SMA Swasta Prayatna Medan T.P 2015/2016.
