

## ABSTRACT

Yusni Sinaga, 2006. The Acquisition the early word combination by two a year old the child. Thesis, Graduate Program in English Applied Linguistics, State University of Medan.

Key words : the acquisition, early word combinations, 2 year old child. The aim of this study is to find out the aspects of the language production content (Stages, patterns and the way) of a 2 year old child. The subject is a boy at the age of 2 years. This study employs qualitative research design in which the researcher involves the key instrument collecting the data from the very beginning up to the end of the process of the study. The data of this study covers :language learning in the middle of the conversation in environment, repetition and making correction. Language infect is acquired but still need to be developed by learning which will pass some stages good leading will help the child in gathering his language by adults as leaders. The way of adults speaking will influence the children way of speaking and their way of thinking as the finding of that thesis.
