CHAPTER V
CONCLUSIONS AND SUGGESTIONS

A. Conclusions

Based on the data analysis, the conclusions were stated as the followings :

1. There were six types of code mixing used in *Cinlok Accidentally in Love* , it consists of 183 (53,37%) inserting word, 71 (22,25%) inserting phrase, 41 (12,85%) inserting hybrid, 3 (0,95%) inserting word reduplication, 1 (0,31%) inserting idiom and collocation, 20 (6,27%) inserting clause. Therefore, there are 193 patterns which are included type of code mixing used by the author of *Cinlok Accidentally in Love.*

2. The type of code mixing is frequently used by inserting word (53,37%). The dominant type is inserting word because she just insert the code mixing into the stucture of the sentence of her sentence in the novel.

3. Inserting word as the dominant type because it is the easiest way to do code mixing by insert the unit of a language into other language.

B. Suggestions

Related to the findings, the suggestions were formulated as the followings :

1. The student can add up theories in sociolinguistics. In addition the finding can be reference for further skills. It is also expected the study will be useful input for English Students to make a further research of code mixing phenomenon in novel or in another setting of language.

2. And the Indonesian author will be inspired to use another type of language vaiation in arranging the sentences of their writing, especially for the novel to create an attractive style of writing.

3. By reading this research futher can be a reference for tearcher and useful to giving explanation about type of code mixing for the students.
