

ABSTRACT

M. NAZAR. The Morphology of Contemporary Acehese. Thesis. English Applied Linguistics Graduate Program. The State University of Medan (UNIMED) 2005.

The aim of this study is to identify and analyze the Morphology of Contemporary Acehese, particularly, morphological process, grammatical properties and types of morpheme. The data of the study were collected from the daily conversation uttered by Acehese speakers. The samples of the study were 30 persons as Acehese speakers. They consist of 15 old men and 15 young men who uttered Acehese. Morphological processes involved the contemporary words which were spoken in daily conversation, namely, morphological process in contemporary Acehese, internal change process in Acehese, compounding, and conversion. Affixation consists of derivation, determination of basic forms, types of derivation, inflection and morphemes.
